

Efficient cable entry with system

Cable entry systems are in increasing demand as an efficient alternative to heavy-duty plug-in connectors and cable glands. They can be used to route assembled cables directly into the control cabinet, to devices, and onto DIN rails without an additional plug-in connection.

For the first time ever, using the unique sealing frame with locking latch you can replace and seal cables without the need for tools.

Phoenix Contact offers a well-designed system solution: from system and field cabling to the DIN rail.

The new CES cable entry system from Phoenix Contact offers:

- Space savings over conventional plug-in connections and cable glands
- Tool-free mounting using unique sealing frames
- Reliable locking, strain relief, and seal with IP54 protection
- Simplified installation and reliable seal up to IP65 using coned sleeves
- Direct and easy mounting on standard panel cutouts
- A wide product range for various different requirements

Sealing frames

With locking latch	Design	Description	Order No.
 Material: polyamide, halogen-free, silicone-free Color: black Temperature range: -40 ... +80°C Degree of protection: IP54 Inflammability according to UL94: V0	B10	For accommodating up to 6 cable sleeves	0801663
	B16	For accommodating up to 8 cable sleeves	0801662
	B24	For accommodating up to 10 cable sleeves	0801661
With screw locking	Design	Description	Order No.
 Material: polyamide, halogen-free, silicone-free Color: black Temperature range: -40 ... +80°C Degree of protection: IP54 Inflammability according to UL94: V0	B10	For accommodating up to 6 cable sleeves	0801660
	B16	For accommodating up to 8 cable sleeves	0801659
	B24	For accommodating up to 10 cable sleeves	0801658
Snap-on frames	Design	Description	Order No.
 Material: polyamide, halogen-free, silicone-free Color: black Temperature range: -20 ... +80°C Degree of protection: IP54 Inflammability according to UL94: V0	B10	For accommodating B10 CES sealing frames, with integrated seal	0801655
	B16	For accommodating B16 CES sealing frames, with integrated seal	0801651
	B24	For accommodating B24 CES sealing frames, with integrated seal	0801647

Accessories for sealing frames

Locking plates	Design	Description	Order No.
	B10		0801645
	B16		0801642
	B24		0801641
Flat gasket	Design	Description	Order No.
	B10	Cutout: 35 mm x 65 mm	0801725
	B16	Cutout: 35 mm x 86 mm	0801726
	B24	Cutout: 35 mm x 113 mm	0801727
Replacement screw	Design	Description	Order No.
		M4, 4 mm Allen screw, for sealing frames with screw locking	0801728
EMC cable catch rails	Design	Description	Order No.
	B16	For mounting on the long side of the sealing frame	3063507
	B24	For mounting on the long side of the sealing frame	3063510
	B10/B16/B24	For mounting on the short side of the sealing frame	3063523

Accessories for cable sleeves

Filler plugs	Design	Order No.	Design	Order No.
 Material: polyamide, halogen-free, silicone-free Temperature range: -20 ... +80°C Degree of protection: IP54 Inflammability according to UL94: V0	3 mm	3063921	11 mm	3064001

		For two AS-Interface cables, arrangement: LL	0801714
		For two AS-Interface cables, arrangement: LR	0801713

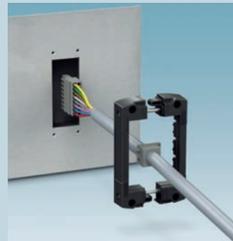

PLUSCON cabinet CES cable entry system

Saves space and costs

The CES cable entry system allows water and dust-proof insertion of a variety of cables into areas with limited space in control cabinets, distributor boxes or devices.

Split sealing frames with metal reinforcement

The sealing frames, which can be split, provide a reliable seal and strain relief for pre-assembled cables according to DIN EN 50262. The plug-in connectors are simply led through the panel cutouts. Thanks to the integrated metal reinforcement of the plastic frames, only two locking elements (screws or latches) are required on the front.

Variable mounting options

The CES sealing frames can be mounted directly on standard panel cutouts (e.g., Rittal) for industrial plug-in connectors. Snap-on frames are available to simplify on-site installation.

Sleeve assembly

1. Select and arrange sleeves

2. Snap sleeves into sealing frame and position sealing frame

3. Push sealing frame together and lock

PHOENIX CONTACT

Optional locking

Sealing frames with screw locking and locking latches are available. The locking latch does not require any tools, which makes it really quick and easy to use, even in places that are difficult to access.

Ideal for industrial plug-in connectors

By widening the standard Rittal cutouts from 35 mm to 51 mm, even wide rectangular HEAVYCON industrial plug-in connectors can be swiveled through mounting panels and sealed and provided with strain relief using the CES cable entry system.

Cable sleeves for every application

The gray thermoplastic sleeves exhibit a low level of flammability according to UL 94 V0 and are resistant to acids and lyes. The black rubber sleeves (NBR) perform significantly better in the long term, particularly in the event of temperature fluctuations. The material used is halogen-free and resistant to oils, fuels, and grease.

Fast installation and a reliable seal

It only takes two coned sleeves to seal any cable diameter ranging from 2 to 24 mm. The coned sleeves are cut to the relevant length and pushed onto the cables before the plug-in connectors are assembled. There is no longer any need to select corresponding slotted rubber seals on site, which can be a time-consuming process, and the reliability of the seal has been significantly improved for ratings up to IP65. Cable binders can be used to further enhance the long-term strain relief and tightness of the coned sleeves.
