# SOLID CONNECTION

Industrial multipole connectors for  
use in especially tough environment conditions.

# HELLO WIELAND ELECTRIC

---

Over 100 years of safe connections.

As the inventor of safe electrical connection technology,  
we are committed to individual and safe system solutions.

Together with our broad product portfolio we offer comprehensive services for industry applications as well as building installation and lighting technology. This experience amounts to Wieland being the global market leader for pluggable, electrical installations in commercial buildings and a dependable partner for machine safety. Our solutions are designed for the secure safety of your team, ensuring that integration of our system is fast and easy while saving time and cost. Thanks to our modular solutions your requirements can be satisfied in a fast, flexible and fail-safe way.

We operate worldwide with subsidiaries, production facilities and sales partners and have an excellent global network. Our specialist teams are supporting customers and projects across the globe - personally and individually. Our competences in engineering, production and logistics processes are interlinked with each other for maximum efficiency.

We look forward to exploring all partnership opportunities with you.

# OUR SECTOR KNOWLEDGE.

---

We have developed special industry knowledge in a wide variety of specialized fields. This forms the basis of our successful solutions.

Machine and system construction

Building installation

Heating, ventilation and air conditioning systems

Light technology

Combustion technology

Conveying technology

Wind energy and Photovoltaic

Lifts and escalators

# OUR SOLUTIONS RANGE

---

for machine building and plant engineering.

podis® – Power bus system installed safely and decentralized with high IP rating

RST® – Round connectors offer highest reliability with IP 69 rating

revos – Industrial connectors for reliable power and signal distribution

fasis + selos – Terminal blocks for the perfect fit in small spaces

Components and solutions for the safety of machines and plants

wiecon® – extensive portfolio of pluggable connectors for circuit boards

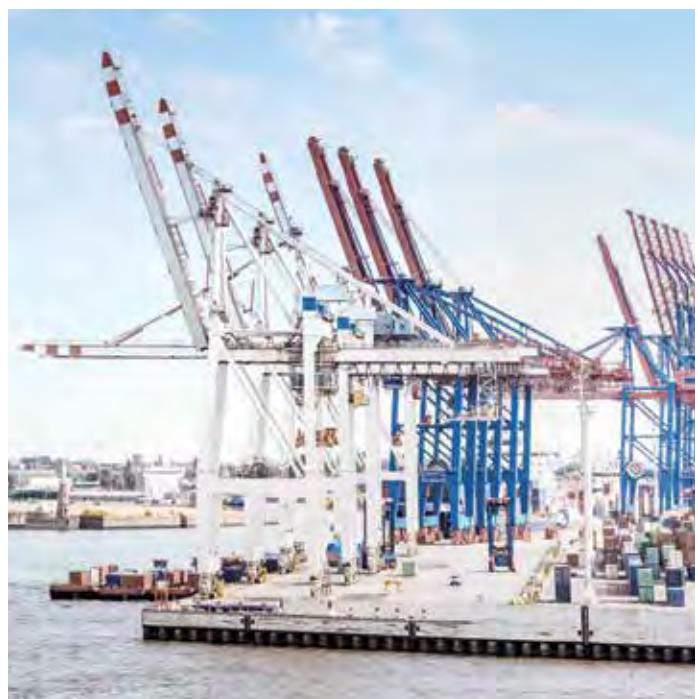

wipos power supply and wienet switches allow for an industrial network and data technology

wienet – Router, Gateways and Cloud Services for a reliable communication all over the world

## The **revos** program An overview of heavy duty connectors

Heavy duty connectors are specifically designed for use in especially tough environment conditions.

The main areas of use are the automotive industry, in packaging machinery and equipment, as well as for instrumentation, control and automation equipment.

They permit simple and time-saving installation of machinery and equipment. Their housings protect against mechanical impact and prevent entry of spray water and dust. The system's sub-assemblies can undergo a quality check in house, which simplifies installation and commissioning at their end use location.

# Overview of the industrial multipole connector range **revos**

## Contact inserts:

### **revos** MINI

The contact inserts for the **revos** MINI connector series are very compact and available with 3 to 12 poles.

You will find the contact inserts for the **revos** MINI connectors on pages 28–31.

---

### **revos** BASIC

The proven connectors and multipole adapters are available in 6 to 92 pole design with screw, spring clamp and crimp connection technology.

You will find **revos** BASIC contact inserts on pages 32–59.

---

### **revos** DD

High contact density in the most compact space – this is what the space-saving contact inserts of **revos** DD offer. Connection is made with the proven turned crimp contacts, with a diameter of Ø 1.6 mm, which offer a connection range from 0.14 to 2.5 mm<sup>2</sup> at a rated voltage of 250 V (600 V CSA/UL).

You will find **revos** DD contact inserts on pages 60–61.

---

### **revos** HD

Contact inserts and multipole adapters with 15 to 64 poles and for currents up to 10 A designed according to DIN EN 175301-801 (previously DIN 46352). The contact inserts are designed in crimp connection technology.

You will find **revos** HD contact inserts on pages 62–69.

---

### **revos** POWER

The contact inserts and multipole adapters are designed for >16 A currents; they are also available with mixed contacts and screw connection.

You will find **revos** POWER contact inserts and terminal block adapters on pages 70–85.

---

### **revos** FLEX

The modular system for the economical and clever mixture of contact inserts. With this flexible system you can customize your connector, to meet the requirements of your application.

You will find **revos** FLEX contact inserts on pages 90–109.

**Housing families:****revos MINI**

The design of the housings for the connectors of **revos MINI** is very compact and available in two materials:

- Die cast zinc alloy
- Polyamide

You will find **revos MINI**-housings on pages 114–115.

**revos BASIC / revos BASIC M**

**PG threads**  
are available  
on request!

The housing of the BASIC series are available in size 6 to 48. For convenient connection of the cables this series is also available in increased height design in sizes 6H–24H. The housings are made of die cast aluminum with, silicon-free finish. The connector series **revos BASIC M** is specifically designed for increased environmental requirements, with stainless steel lever and bolt and chemically stable sealing.

You will find **revos BASIC**-housings on pages 118–192.

You will find **revos BASIC M**-housings on pages 194–209.

**revos HD**

**PG threads**  
are available  
on request!

The housings of the HD series are available in size 10/15 to 32/50. You will find **revos HD**-housings on pages 210–223.

**Special multipole connector designs:****revos Ex**

**revos Ex** multipole connectors are designed for special applications in hazardous areas. Their use in zone 1 for intrinsic circuits has been approved by the BVS test institute. The housings for the multipole connectors are manufactured from die cast zinc alloy.

You will find **revos Ex**-contact inserts on pages 88–89.

You will find **revos Ex**-housings on pages 224–243.

Operating instructions for **Ex** plug connectors, see facts&DATA.

**revos IT**

Data cable feed-throughs – the ideal solution for the installation of pre-assembled cables to enclosures. Sealed and with strain relief. Inserts with D-Sub connectors 9 to 100 pole.

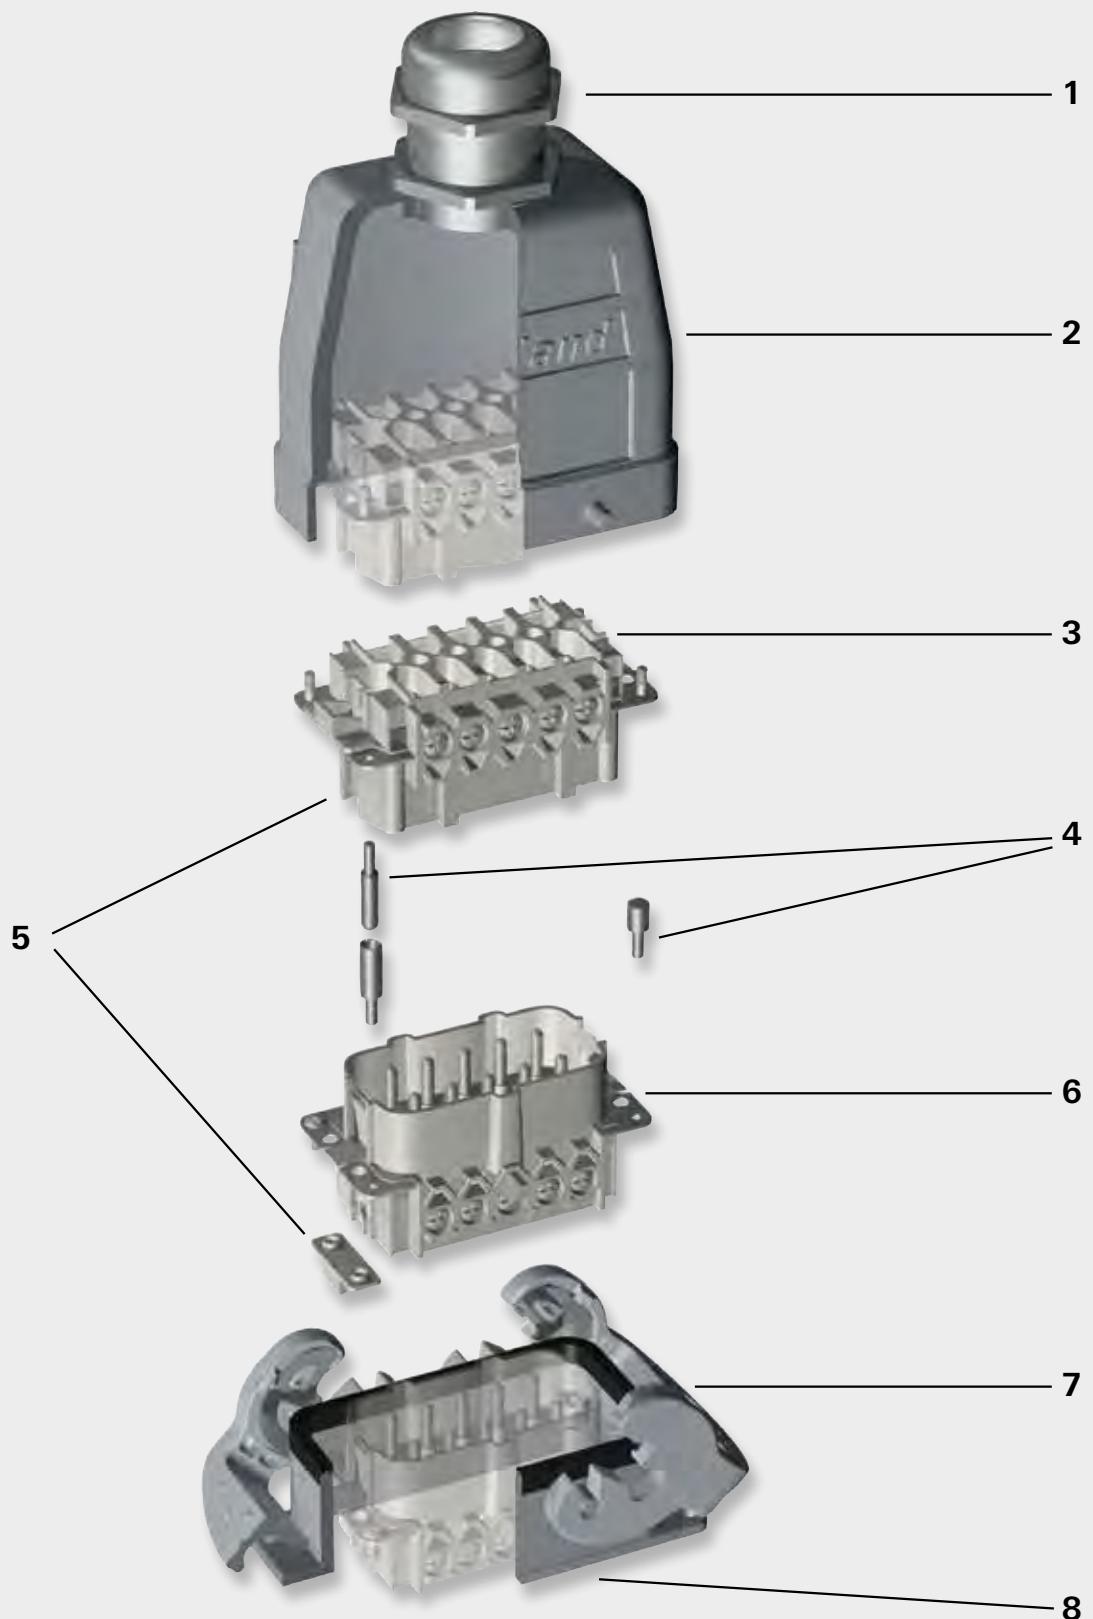

You will find **revos IT** products on page 86.

**revos MOT**

**revos MOT** plug connectors with plastic housings, simple and easy handling due to its unique latching system.

You will find **revos MOT** products on pages 110–111.

## General design of a **revos** industrial multipole connectors

## 1. Cable glands

For revos industrial connectors the following cable glands are available:

- Cable gland without strain relief, protection degree IP54, 7x.xxx.xxxx.0 fully assembled
- Cable glands, protection degree IP68, available as accessories in plastic or brass
- EMC cable glands

## 2. Hoods

Aluminum die cast alloy, silicon-free finish (housings for **revos Ex**- and **revos MINI** are manufactured from die cast zinc alloy)

- Low and increased height designs available
- Cable entry at the side, on top or at the front
- With or without locking levers

## 3. Female inserts

Available in the following connection techniques:

- Screw connection
- Spring clamp connection
- Push-in connection
- Crimp connection

## 4. Coding accessories

Coding pins, female coding pieces and coding bolts

## 5. Coding bolts

Coding pieces are used for coding 690 V contact inserts.

In the 690 V housings the coding ribs are removed and insulating tape is attached inside the housing in order ensure the creepage distances and clearances to live parts.

This mechanical coding prevents the 690 V contact inserts from being mounted in 500 V housings.

## 6. Male inserts

Available in the following connection techniques:

- Screw connection
- Spring clamp connection
- Push-in connection
- Crimp connection

## 7. Locking levers

Single or double locking lever in plastic, steel or stainless steel design.

## 8. Bases

Aluminum die cast alloy, silicon-free finish (housings for **revos Ex**- und **revos MINI** are manufactured from die cast zinc alloy)

- Low and increased height designs available
- Open-bottom and closed-bottom bases
- Single or double locking lever of plastic, steel or stainless steel
- Coupling for "cable-to-cable connections"

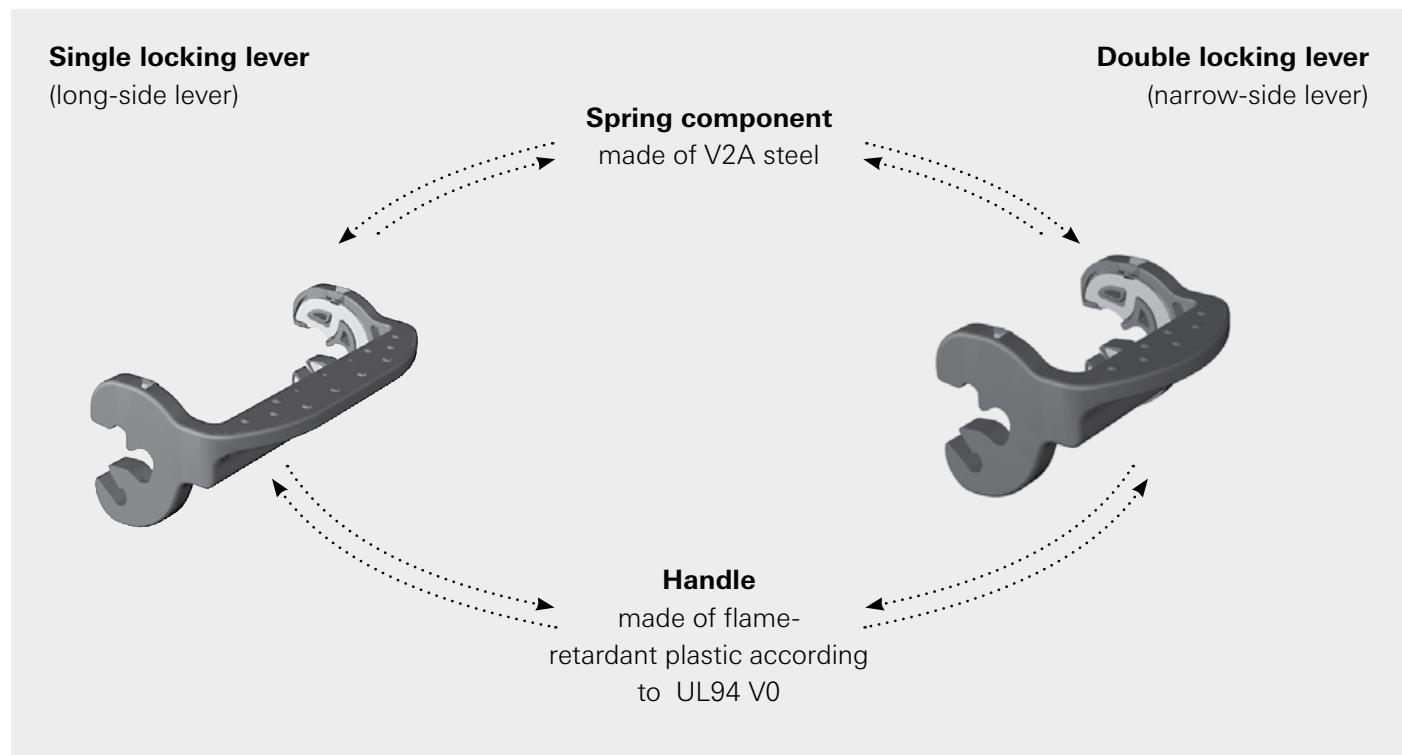

# The locking mechanism of the revos BASIC industrial multipole connectors

The locking levers secure the mechanical connection between hood and housing. The locking mechanism is also a main determinant of the connector's IP protection rating. Wieland's standard **revos** BASIC connectors in size 6 to 24 are equipped with locking levers that are made of two components.

The handle consists of flame-retardant and halogen-free plastic material and ensures convenient and almost wear-free locking. The retention force is provided by a spring component that is made of V2A stainless steel and also resists aggressive environmental conditions.

## Locking features:

- Low-wear locking mechanism
- High holding forces
- Plastic material suitable for outdoor applications
- Salt and seawater resistant, UV resistant
- During overhead mounting the lever will remain in the open position
- Replaceable
- Self-extinguishing plastic material according to UL 94 V0

In general we distinguish levers on the hood and levers on the base, as well as single locking levers (on the long side) and double locking levers (on the narrow side).

#### **The following lock types are available:**

**One long-side lever**  
(single locking lever)

**Two narrow-side levers**  
(double locking lever)

#### **Connectors for cable-to-cable couplings:**

**One long-side lever**  
(single locking lever)

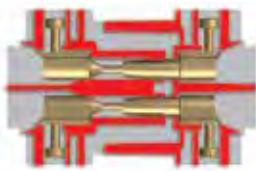

**Two narrow-side levers**  
(double locking lever)

Locking levers made of steel or stainless steel are available on request.

In case of any questions our connector hotline (+49 951/9324-997) will be happy to assist you.

# Connection technologies

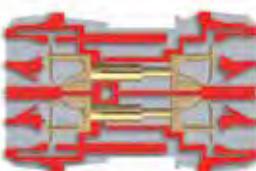

## Screw connection technology:

This connection technology is the one most frequently used today. Screw connectors are designed according to EN 60 999/VDE 0609.

## Features of this connection technology:

- Operation is simple and easy
- No special tools required
- High-quality connection that can be used for all areas of application
- Non-permanent connection, rewiring possible

## Spring clamp connection technology:

In the last few years this connection technology has been established as an industrial standard. Spring clamp connectors are designed according to EN 60 999/VDE 0609.

## Features of this connection technology:

- Easy handling / No special tools required
- High-quality connection even under vibration
- Non-permanent connection, rewiring possible

For contact inserts with spring clamp connection technology all wire types (solid, stranded, fine-stranded) can be used without special preparation of the wires.

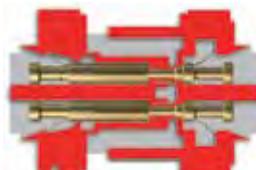

When ferrules are used they must be crimped to the wire by means of a special positively driven crimping tool.

## Push-in connection technology

Push-in, the simple, quick and tool-less connection system for prepared conductors.

## Features of this connection technology:

- Extremely short connection time
- Gas-tight and vibration-proof connection
- Testing potentials even in the inserted state

## Crimp connection technology:

This connection technology provides the highest quality, but is also the most demanding. The technical requirements for crimp connections are defined in the IEC 60 352-2 standard. Crimp connections must always be produced using a crimping tool that has been designed for the contact. Wieland crimping tools are specifically adapted to the contacts and thus ensure a permanent and corrosion-resistant connection.

## Features of this connection technology:

- High-quality connection similar to cold welding
- Consistent repeatability of the crimp connection
- Suitable for automation during pre-assembly of cable harnesses
- Compact design that allows a high contact density
- Special crimping tool required
- Permanent connection

## Screw connection technology:

Screw terminals are measured in accordance with EN 60 999/VDE 0609.

Please refer to the respective tightening torques from table 4 on page 290.

The contact point can be delivered with or without wire protection.

Clamping bodies with wire protection do not require any preparation of the wires.

Clamping bodies without wire protection require appropriate preparation of the wires in case fine-stranded wires are used.

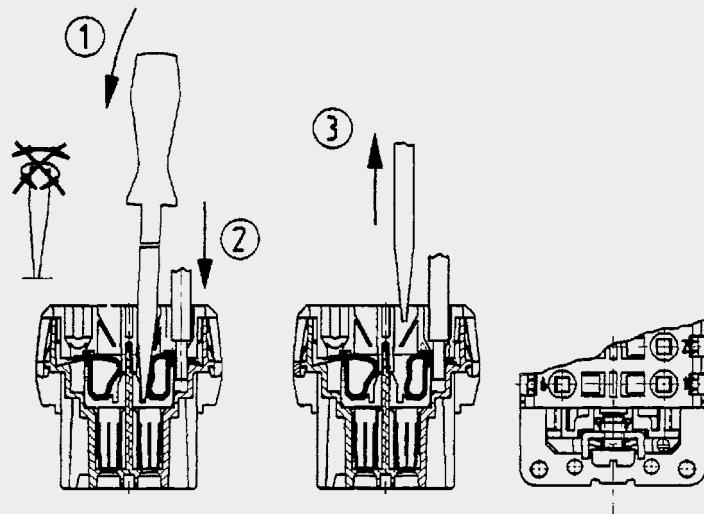

## Spring clamp connection technology:

### Operating instructions:

1. Insert the screwdriver using a slight curving motion into the rectangular opening.
2. Open the clamping body.  
The screwdriver will stay in position, and hold the clamping body open.
3. Insert the wire into the round wire entry guide and remove the screwdriver.

**Screwdriver:** 0.6 mm x 3.5 mm

**Part number:** 06.502.4000.0

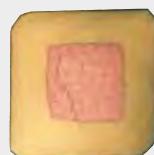

## Crimp connection technology:

Using the suitable tools when producing crimp connections is essential. Correct and gas-tight connections can only be ensured by tools that are particularly adapted to the contact.

Wieland crimping tools compress the contact point with a so-called B crimp or a square crimp to make it gas-tight.

**Micrograph  
of a B crimp**

**Micrograph  
of a square crimp**

A contact to tool assignment can be found on page 305.

### Contact materials:

**revos**-connectors are available with tin-plated, silver-plated or gold-plated contacts.

The basic material is a high-quality copper alloy.

For exact explanations, see pages 296–297.

## Housing series **revos** BASIC

### Single locking lever

#### Hoods

#### Bases

Size (GB):

- GB 6, 10, 16, 24, 48
- GB 6H, 10H, 16H, 24H

Motor connector  
housing

Coupling housings

### Double locking lever

#### Hoods

GB 16XL, 24XL with extra  
large wiring space

#### Bases

Size (GB):

- GB 6, 10, 16, 24, 32
- GB 10H, 16H, 24H, 16XL, 24 XL

Coupling housings

H  $\triangleq$  increased height design; XL  $\triangleq$  extra large wiring space. All bases are also available with a protective cover. For an assignment of the contact inserts to the housing sizes see page 20-23 as well as the product matrix on page 24-25.

## Housing series **revos** HD

### Single locking lever

#### Hoods

#### Bases

Size (GB):

- GB 10/15, 16/25

### Double locking lever

#### Hoods

#### Bases

Size (GB):

# Product matrix

The **revos** product matrix provides an overview of the available families of contact inserts and their matching housing series. Horizontally you can find the contact inserts sorted per family and with indications for rated voltage, rated current and connection technology. Vertically the housing series and their variations in size are shown. Matching combinations are found in the matrix.

The restrictions of the **revos FLEX** and **revos HD** contact inserts are caused by their depth and cable density inside the housing when fully equipped with contact inserts. In case of any questions regarding these combinations, our connector hotline (+49 951 9324-991) will be happy to assist you.

## **revos contact inserts offer many possibilities**

The task of the contact inserts is distribution of power and signals. The contact inserts are available in 2- to 216-pin design. They are suitable for current from 4 to 100 A and voltages up to 5.5 kV.

**revos MINI** - Their especially compact design allows them to fit in applications for machine, control and switching systems, or also in small motors and lighting equipment, and also serve as classic contact inserts for industrial heavy duty connectors.

**revos BASIC** is able to meet the toughest demands and so is used, for example, in the automotive industry, the machinery and equipment industry, in conveyor systems and in measurement and control technology.

## 8-/24-pole + ground

## Disassembling the power contacts

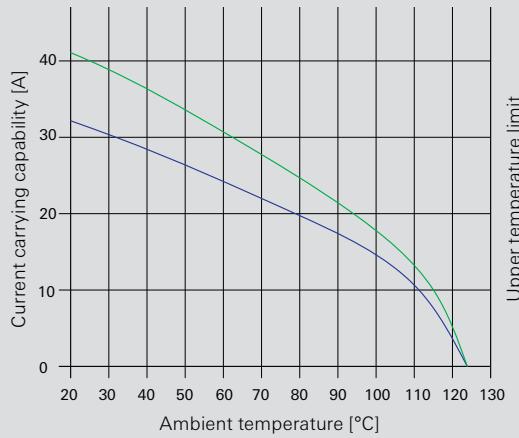

1) Insert screwdriver (size 0 DIN ISO 8764-1-PH) up until stop in opening of the contact to be disassembled.

2) Pull contact out of the contact insert by its wire.

## Dimensions

### Male insert

### Female insert

### General requirements

- Due to reduced cross sections at PE contacts of frames, the PE contact has to be additionally protected against short circuits by using a protection circuit offering a sufficiently short breaking time (< 0,25 s).
- Parts to be used as connectors, not as plug devices (connector with breaking capacity). Do not mate under current or voltage!

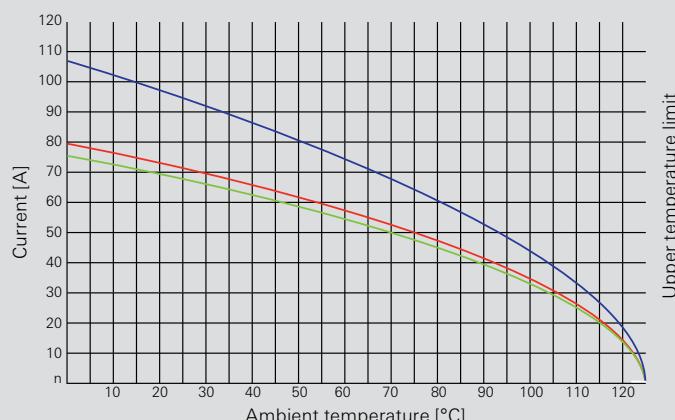

### Derating curve

## ***revos* housing components – simply, safely protected**

The ***revos*** housing components for heavy duty connectors consist of high-quality aluminum and zinc die casting. Wieland has designed the housings to be corrosion-resistant, water and dust tight, and usable under the toughest environmental conditions.

# Robust and convenient

The connector series **revos** BASIC M was specifically designed for increased environmental requirements.

**P**lant construction and engineering as well as construction machinery or wind power stations have the highest requirements for industrial connectors: Vibration, intruding humidity and corrosion are only few of the stress factors electric connection technology has to stand up to. The **revos** BASIC M connectors are robust, durable and at the same time more convenient to use. The practical single locking lever lets you actuate the connectors safely even in confined spaces. The stainless steel locking levers are coated with heat-resistant, thermoplastic material. Ergonomic grip grooves provide better handling and ensure that the connector can be actuated under any ambient conditions. The movable locking bolts and the locking lever with rollers are also made of stainless steel and are very resistant to wear and abrasion. The optional aluminum cover ensures increased flexibility on site and protects the connectors in case service is needed.

## Single locking lever

## Chemically stable sealing

## Stainless steel lever and bolt

### Requirements

- Vibration test acc. to DIN 60068-2-6 (10-150Hz/2g)
- Vibration test acc. to DIN EN 61373-1-B
- Methods of exposure to laboratory light sources acc. to DIN EN ISO 4892-2
- Ozone test acc. to DIN ISO 1431-1:2011-05
- Corrosion protection (NSS) of >2000 hrs according to DIN EN ISO 9227

## ***revos* accessories – all that you need**

We offer a wide range of accessories in our portfolio of heavy duty connectors, such as DIN rail mounting frames, knock-out cover plates, coding pins, cable glands, covers for our housings, labeling accessories, and the related tools.

# Mounting frames for **revos** contact inserts

The mounting frames of the **revos** BASIC family are ideal for use in low-voltage switching systems. They are mounted directly to the 35x15 DIN rail according to DIN EN 50022 inside the control cabinet. Use of the DIN rail mounting frame on a 7.5 mm high DIN-rail 35 x 7.5 in accordance with DIN EN 50022 is only possible if the installation space behind it is free.

### **The system has the following advantages:**

- Reduction of material and mounting costs
- Simple and trouble-free installation
- Wire harness assemblies possible
- Easy troubleshooting with hinged top that enables access to the back of the connector.
- Re-wiring is possible without disconnecting.

The robust contact inserts of the **revos** family in use worldwide are used for this purpose.

The following contact inserts are available:

• **revos** BASIC  
Size 6, 10, 16, 24

• **revos** POWER  
Size 16, 24

• **revos** HD  
40- and 64-pole

• **revos** FLEX  
Size 6, 10, 16, 24

• **revos** BASIC EE  
Size 6, 10, 16, 24

• **revos** DD  
Size 6, 10, 16, 24

GB 24/GB 16	Reduction plate 24 to 16	07.416.6553.0	10	
<b>Technical data</b>				
Material	Polyamide			
Color	RAL 7032			
Degree of protection	IP65			
Flammability	UL94-V0			
<i>revos</i> reducer plate adapt the cut-outs of size 24 to sizes 6, 10 or 16.				

## Coding of *revos* multipole connectors

Each family of contact inserts has its unique design. Mismating of the different families' contact inserts is therefore impossible due to the design. However, if several connectors or the same size and family are mounted directly adjacent to one another, mismating may occur during start-up of the machine or system.

In order to avoid mismating we developed coding bolts, coding pins and female coding pieces that are to be assembled instead of the regular mounting screws of the contact inserts.

Six different codings can be achieved when coding bolts are used.

### Coding bolts of version A

Suitable for the following contact inserts / multipole adapters:

- ***revos*** BASIC
- ***revos*** POWER
- ***revos*** HD
- ***revos*** FLEX
- ***revos*** EX

that are mounted to the housing at the **front**.

Suitable for:

- Screw termination inserts with part numbers:  
70.2XX.XXXX.X  
70.3XX.XXXX.X  
70.4XX.XXXX.X  
72.2XX.XXXX.X  
72.3XX.XXXX.X
- Crimp termination inserts with part numbers:  
70.7XX.XXXX.X  
72.7XX.XXXX.X  
73.7XX.XXXX.X
- Spring clamp termination inserts with part numbers:  
70.5XX.XXXX.X
- Terminal block adapter inserts (mountable from the front) with part numbers:  
70.7XX.XXXX.X  
72.7XX.XXXX.X  
73.7XX.XXXX.X

Coding options also exist for combinations of screw and crimp inserts and terminal block adapters.

### Coding bolts of version B

Suitable for the following contact inserts / multipole adapters:

- ***revos*** BASIC
- ***revos*** POWER
- ***revos*** HD

that are mounted to the housing at the **rear**.

These are mainly multipole adapters that are mounted from the inside of the control cabinet.

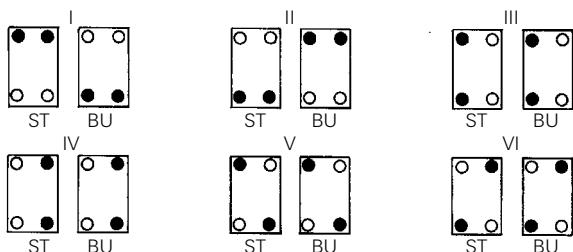

Suitable for:

- Combination of screw, crimp, spring-type inserts and clamp adapters in connection with terminal block adapters (mountable from the back of the housing) with part numbers:  
70.9XX.XXXX.X  
72.9XX.XXXX.X  
73.1XX.XXXX.X

## Six coding options by means of locking pins

With the use of locking pins, there are a total of six combinations for 3, 6, 10, 16, 24-pin plug connectors

One contact insert

● Coding bolt

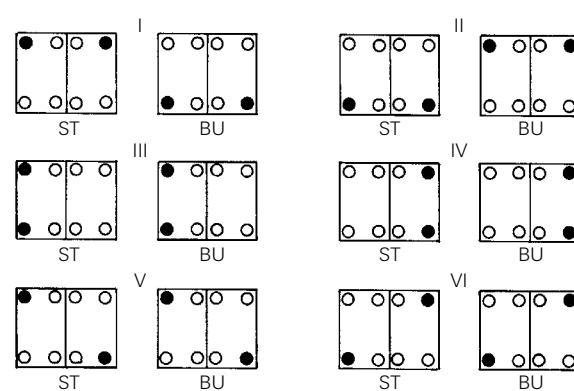

○ Mounting screws

ST Male connector

BU Female connector

An additional six combinations are possible for the heavy duty connectors with two contact inserts (20, 26, 32 and 48-pin plug connectors).

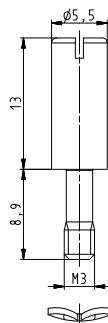

Two contact inserts

## Coding options for *revos* multipole connectors

72 coding options by means of coding pin, coding key and coding socket

### Part No. for Version A

Suitable for the following contact inserts/multipole adapters:

**revos** BASIC, **revos** POWER, **revos** HD,  
**revos** FLEX, **revos** EX

that are mounted to the housing at the **front**.

### Part No. for Version B

Suitable for the following contact inserts/multipole adapters:

**revos** BASIC, **revos** POWER, **revos** HD

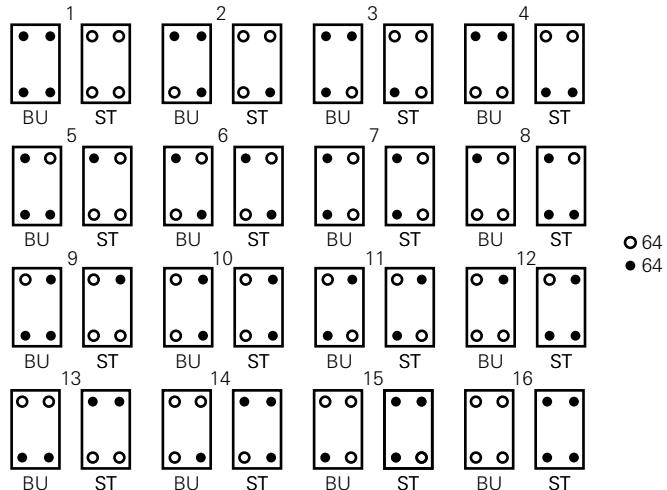

that are mounted to the housing at the **rear**.

The use of coding pins and female coding pieces enables 16 different coding options.

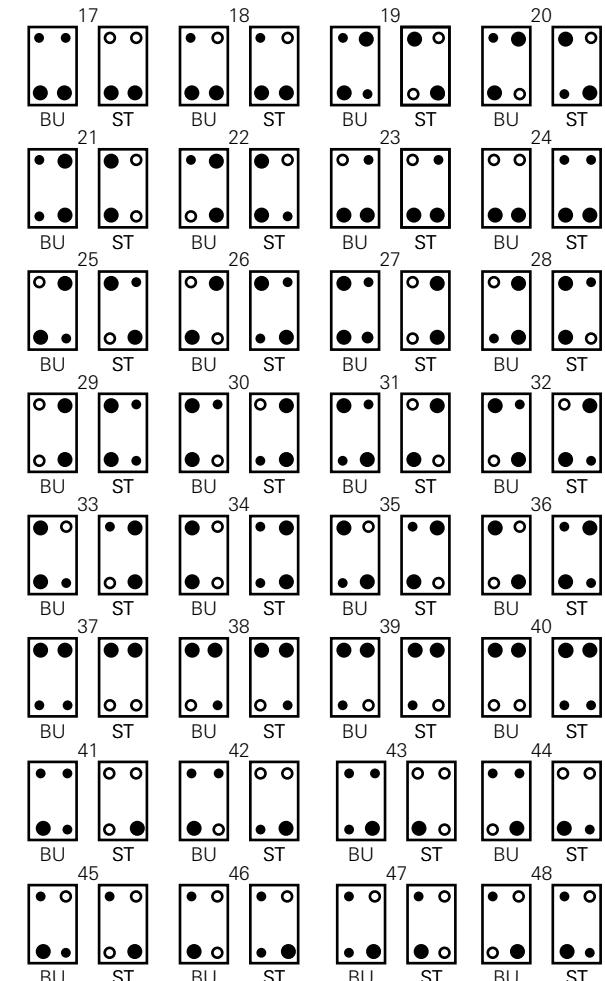

With an additional coding bolt up to 72 coding options are possible.

All mounting screws must be replaced by the coding components.

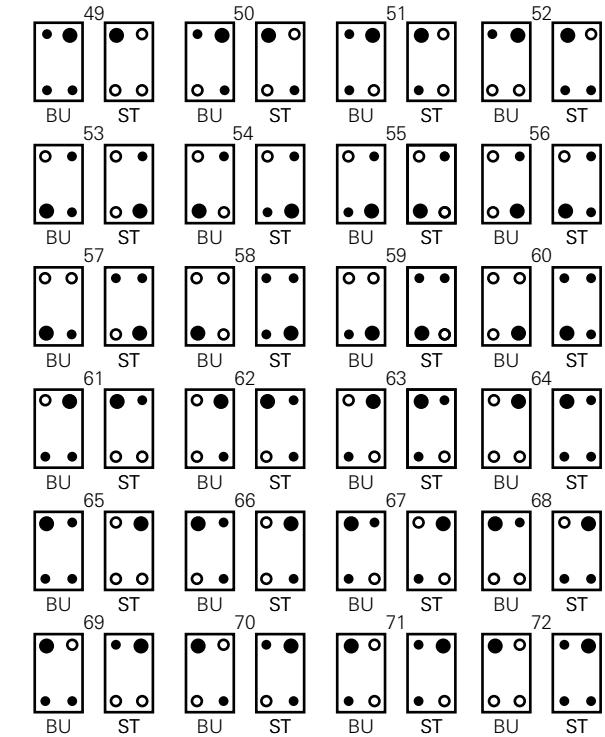

With 15- or 25-pin plug connectors of the series 73.7 ... 16 coding options result, because the coding pin cannot be used here.

## 16 coding options for **revos** MINI 12-pole

Coding piece	Description	Type	Part No.	P.U.
	<b>Coding piece</b>	MIN KOD 12	05.568.0353.0	20
<b>Technical data</b>				
Material	Poyamide			
Make-up	4 coding pieces on the web			
If the MIN KOD coding piece is used, there are 16 coding options for the <b>revos</b> MINI 12-pole.				

**Coding schematic:**

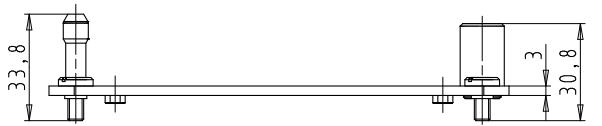

# revos Docking frame

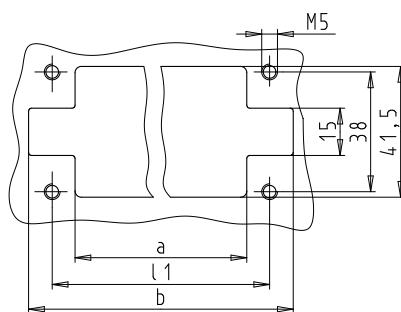

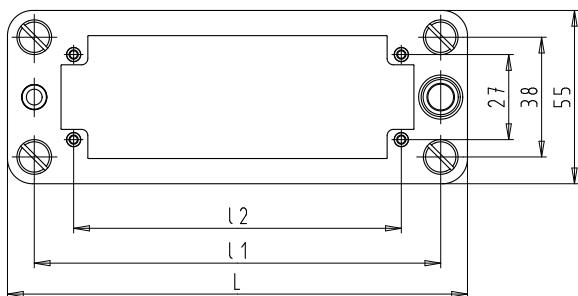

Docking frame	Description	Type	Part No.	P.U.
<b>revos docking frame</b>				
Size 6	ADR 6	Z5.560.1019.0	1	
Size 10	ADR 10	Z5.560.1119.0	1	
Size 16	ADR 16	Z5.560.1219.0	1	
Size 24	ADR 24	Z5.560.1319.0	1	
<b>Technical data</b>				
<b>Material</b>				
Docking frame	Stainless steel			
Fastening screws	Steel, galvanized			
<b>Floating tolerance</b>				
X-axis	±1.5 mm			
Y-axis	±1.5 mm			
<b>Mechanical life</b>				
Mating cycles	500			
<b>Scope of supply</b>				
	1 docking frame, including 4 fastening screws M3			
<b>System features</b>				
	For use in combination with <b>revos</b> BASIC, POWER, FLEX and DD contact inserts			
	Symmetric design and hence "mutually-pluggable"			
	Installation type can alter the air gap and creepage distances, and therefore influence the rated voltage.			
	Mounting wall must be earthed due to the floating frame

Protective covers with locking levers	Description	Type	Part No.	P.U.
<b>Double locking lever</b>	<b>revos protective cover for single locking lever, with gasket plastic locking levers</b>			
<b>Size 10</b>	Size 6	BAS AD DH 06 PA	Z7.428.1153.0	10
Plastic locking levers, with gasket	Size 10	BAS AD DH 10 PA	Z7.428.5553.0	10
	Size 16	BAS AD DH 16 PA	Z7.428.5653.0	10
	Size 24	BAS AD DH 24 PA	Z7.428.5753.0	10
	<b>steel locking levers</b>			
	Size 6	BAS AD DH 06 ST	Z7.428.1110.0	10
	<b>stainless steel locking levers</b>			
	Size 6	BAS AD DG 06 VA	Z7.428.1119.0	10
<b>Double locking lever</b>	<b>for double locking lever, with gasket plastic locking levers</b>			
<b>Size 10</b>	Size 10	BAS AD DD 10 PA	Z7.428.1253.0	10
steel locking levers, with gasket	Size 16	BAS AD DD 16 PA	Z7.428.1353.0	10
	Size 24	BAS AD DD 24 PA	Z7.428.1453.0	10
	<b>steel locking levers</b>			
	Size 10	BAS AD DD 10 ST	Z7.428.1210.0	10
	Size 16	BAS AD DD 16 ST	Z7.428.1310.0	10
	Size 24	BAS AD DD 24 ST	Z7.428.1410.0	10
	<b>stainless steel locking levers</b>			
	Size 10	BAS AD DD 10 VA	Z7.428.1219.0	10
	Size 16	BAS AD DD 16 VA	Z7.428.1319.0	10
	Size 24	BAS AD DD 24 VA	Z7.428.1419.0	10
<b>Double locking lever</b>	<b>for double locking lever, without gasket plastic locking levers</b>			
<b>Size 10</b>	Size 10	BAS AD DC 10 PA	Z7.428.1653.0	10
stainless steel locking levers, with gasket	Size 16	BAS AD DC 16 PA	Z7.428.1753.0	10
	Size 24	BAS AD DC 24 PA	Z7.428.1853.0	10
<b>Technical data</b>				
Material/Gasket	Polyamide/NBR			
Color	silver gray, RAL 7001			
Degree of protection	IP65			
Flammability	UL94-V0			

## Dimensions

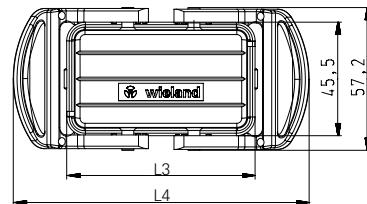

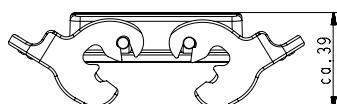

### Single locking lever with clamp, plastic

Size	L1 [mm]	L2 [mm]
6	62.5	75
10	75.5	90
16	96	110.5
24	122.5	137

### Double locking lever with clamp, plastic

Size	L3 [mm]	L4 [mm]
10	75.5	119
16	96	140
24	122.5	166

## Protective cover for ***revos*** BASIC Housings Size 32

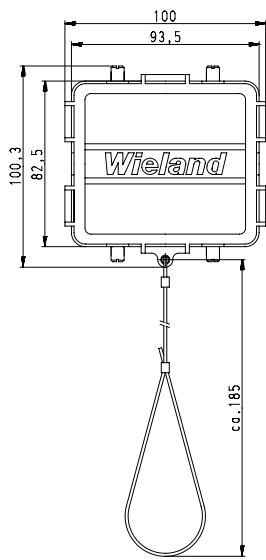

Description	Type	Part No.	P.U.
<b><i>revos</i> protective cover with tether cord + loop without locking levers, without gasket</b>			
Size 32	BAS AD DA 32 FS ST	Z7.419.6228.0	10
<b>with locking levers, with gasket</b>			
Size 32	BAS AD DD 32 FS ST	Z7.419.6128.0	10
<b>Technical data</b>			
Material	Die cast aluminum		
Surface	Silicon-free		
Locking levers	Zinc-plated steel		
Gasket	NBR		
Degree of protection	IP65		

### Protective covers without locking levers, without gasket

## Protective cover for *revos* MINI Housings

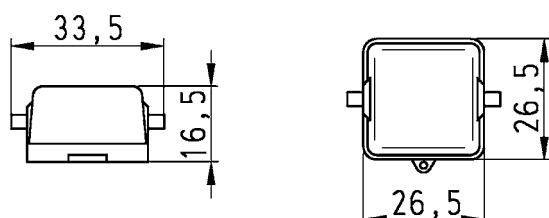

Protective cover without gasket	Description	Type	Part No.	P.U.
<b>Protective cover for <i>revos</i> MINI Housings without gasket for male insert</b>				
plastic	MIN AD DA 7 P	07.417.6753.0	10	
Metal	MIN AD DA 7 Z	07.417.6729.0	10	
<b>with gasket for female insert</b>				
plastic	MIN AD DB 7 P	07.417.6853.0	10	
Metal	MIN AD DB 7 Z	07.417.6829.0	10	
<b>Technical data</b>				
Material	Die cast zinc alloy/Polyamide			
Surface	Silicon-free			
Locking levers	-			
Gasket	NBR			
Degree of protection	IP65			

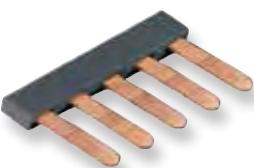

Protective cover with gasket (on the inside)

## Tools and Accessories

Crimping tool kit		Description	Type	Part No.	P.U.
		<b>Crimping tool for revos contacts</b> Crimping tool without crimping die and positioner		95.101.0800.0	1
<b>Accessoires for crimping tool see page 304.</b>					
For assignment of contacts to crimping tool see page 305.					
Stripping tool		Description	Type	Part No.	P.U.
		<b>Tool</b> Stripping tool	0.08 – 10mm <sup>2</sup> / 28 – 7 AWG	95.350.0100.0	1
Hand crimping tool		Description	Type	Part No.	P.U.
		<b>Crimping tool for contacts Ø 1 mm see page 96.</b> Hand crimping tool without contact positioner Hand crimping tool with contact positioner		95.101.2100.0	1
				95.101.2200.0	1
Screwdriver		Description	Type	Part No.	P.U.
		<b>Tool</b> Screwdriver	Blade 0.6x3.5 form "B"	06.502.4000.0	5
For use with contact inserts and multipole adapters with spring clamp connection					
Axial screwdriver		Description	Type	Part No.	P.U.
		<b>Tool</b> Axial screwdriver	POW AXIALSHR ISK SW2	05.502.4500.0	5
Extraction tool		Description	Type	Part No.	P.U.
		<b>Tool</b> Extraction tool Extraction tool Extraction tool	HD 500/690V-SER. 505.4400.0	05.502.0000.0 05.502.3500.0 05.502.4400.0	1 1 1
Jumper bar for revos BASIC multipole adapters		Description	Type	Part No.	P.U.
		<b>Insulated jumper bar for revos BASIC multipole adapters</b> <b>Number of poles</b>			
		2-pole		Z7.256.0227.0	10
		3-pole		Z7.256.0327.0	10
		6-pole		Z7.256.0627.0	10
		8-pole		Z7.256.0827.0	10
		12-pole		Z7.256.1227.0	10
<b>Technical data</b>					
		Material	Polyamide		
		Rated voltage	500 V		
		Rated current	16 A		

## Marking tag carriers

### Marking tag carriers for multipole adapters

Description		Type	Part No.	P.U.
<b>Marking tag carriers, complete</b>				
40-pole			Z4.242.3753.0	10
64-pole			Z4.242.4053.0	10
<b>Marking tags</b>				
<b>Single tag, max. 3-digits</b>				
unmarked	marking field 8.3x4.5 mm	9705 A	04.242.0850.0	500
<b>Single tag, max. 8-digits</b>				
unmarked	marking field 14x4.5 mm	9705 AL	04.242.1553.0	500
<b>Marking strip with 12 tags, 6.7 mm spacing</b>				
unmarked	marking field 8.3x6.45 mm	9705A/6,7/12	04.242.6753.0	25
marked	1 – 9	9705A/6,7/12 B 1- 9	99.000.0920.8	25

### 45° Marking tag carrier

Description		Type	Part No.	P.U.
<b>Marking tag carriers</b>				
<b>2x4-digits, 45°</b>		9705 A/4 W	04.242.2853.0	200
<b>Marking tags</b>				
<b>Single tag, max. 3-digits</b>				
unmarked	marking field 8.3x4.5 mm	9705 A	04.242.0850.0	500
<b>Single tag, max. 8-digits</b>				
unmarked	marking field 14x4.5 mm	9705 AL	04.242.1553.0	500
<b>Marking strip with 12 tags, 6.7 mm spacing</b>				
unmarked	marking field 8.3x6.45 mm	9705A/6,7/12	04.242.6753.0	25
marked	1 – 9	9705A/6,7/12 B 1- 9	99.000.0920.8	25
<b>Marking strip with 12 tags, 6.7 mm spacing</b>				
24-pole	marked 1 – 24	9705A/6,7/2X12 B 1-24	99.005.0920.8	25

## Marking tags

Tear-off marking strip	Description	Contents	Type	Part No.	P.U.

**revos facts&DATA**

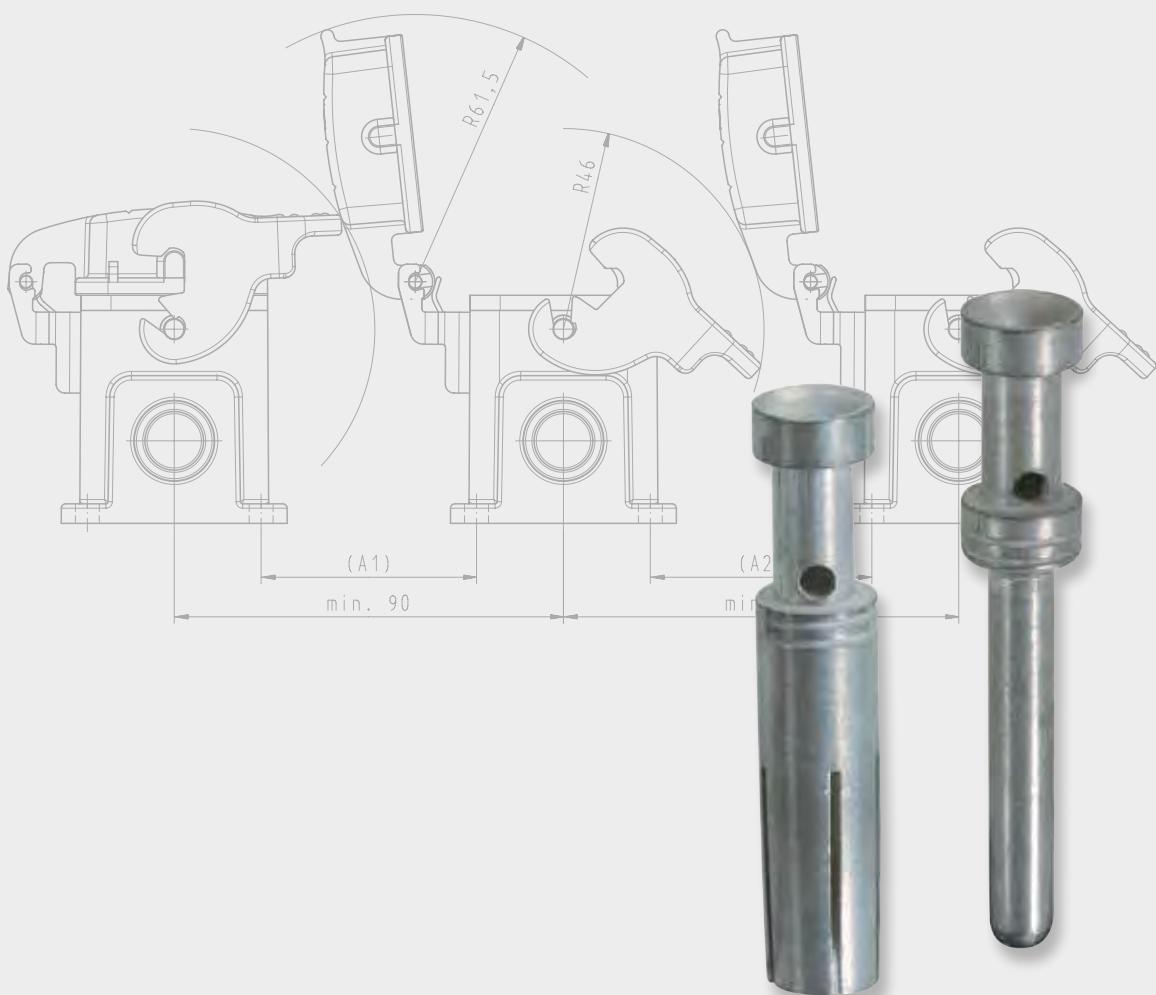

On the following pages, you will find all important

information on our **revos** products.

But our Wieland customer service team is also happy

to help you, at telephone number +49 951 9324-991.

We look forward to hearing from you.

# Conductor connections

## Rated connection capacity and suitable conductor

**Table 1:** (EN 60 999-1: 2000): Relationship between rated connection capacity and diameter of the conductor

Rated connection capacity	Theoretical diameter of the largest conductor										Connectable conductor	
	Metric				AWG						Rigid	Flexible
	Rigid		Flexible		Conductor size	Rigid		Flexible		Rigid	Flexible	
mm <sup>2</sup>	Solid mm	Multistrand mm	mm	Conductor size	mm	Solid mm	Multistrand mm	mm	mm			
0.2	0.51	0.53	0.61	24	0.54	0.61	0.64	-	-	Must be set in the relevant product standard		
0.34	0.63	0.66	0.8	22	0.68	0.71	0.80	-	-			
0.5	0.9	1.1	1.1	20	0.85	0.97	1.02	-	-			
0.75	1.0	1.2	1.3	18	1.07	1.23	1.28	-	-			
1.0	1.2	1.4	1.5	-	-	-	-	-	-			
1.5	1.5	1.7	1.8	16	1.35	1.55	1.60	-	-			
2.5	1.9	2.2	2.3 <sup>a)</sup>	14	1.71	1.95	2.08	-	-			
4.0	2.4	2.7	2.9 <sup>a)</sup>	12	2.15	2.45	2.70	-	-			
6.0	2.9	3.3	3.9 <sup>a)</sup>	10	2.72	3.09	3.36	-	-			
10.0	3.7	4.2	5.1	8	3.34	3.89	4.32	-	-			
16.0	4.6	5.3	6.3	6	4.32	4.91	5.73	-	-			
25.0	-	6.6	7.8	4	5.45	6.18	7.26	-	-			
35	-	7.9	9.2	2	6.87	7.78	9.02	-	-			
					<sup>b)</sup>	/ Class B	<sup>c)</sup> / Class I, K, M					

**Note:** The diameters of the largest rigid and flexible conductors are based on Table 1 in accordance with IEC 60 228A and IEC 30 344 and for AWG conductors on ASTM B 172-71 [4], ICEA Publication S-19-81 [5], ICEA Publication S-66-524 [6], and ICEA Publication S-66-516 [7]

<sup>a)</sup> Dimensions only for flexible cables of class 5 in accordance with IEC 60 228A.

<sup>b)</sup> Nominal diameter + 5%

<sup>c)</sup> Largest diameter for each of the three classes I, K, M, + 5%

## Theoretical diameter of the largest conductor and relationship between rated cross section and connectable conductors

**Table 2:** (EN 60 999-2: 2003): Relationship between rated cross section and diameter of the conductors

Rated cross section	Theoretical diameter of the largest conductor			Connectable conductor	
	Metric			Rigid	Flexible
	Rigid	Multistrand	Flexible <sup>a)</sup>		
mm <sup>2</sup>	mm	mm	mm		
50	9.1	-	11.0	Must be set in the relevant product standard	
70	11.0	-	13.1		
95	12.9	-	15.1		
-	-	-	-		
120	14.5	-	17.0		
150	16.2	-	19.0		
185	18.0	-	21.0		
-	-	-	-		
240	20.6	-	24.0		
300	23.1	-	27.0		

**Note:** The diameters of the largest rigid and flexible conductors are based on Table 1 and Table 3 of IEC 60 228A.

<sup>a)</sup> Dimensions only for flexible conductors of class 5 in accordance with IEC 60 228A.

# Conductor connections

## Standard cross sections of round copper conductors AWG/metric

Comparison between AWG/kcmil and metric sizes			
Metric size ISO	AWG	kcmil	mm <sup>2</sup>
mm <sup>2</sup>			
0.1 *	28		0.081

240	-	-	20.6	61	24	1224

## Current load capacity of cables or lines

Recommended values for current load capacity of cables or lines for fixed installation and open-air installation should be taken from DIN VDE 0298 Part4/08.2003

# Tightening torque

## Tightening torque of screw connections

Extract from EN 60 947-1

Tightening torque for proving the mechanical tightness of screw connections

**Table 4:** Tightening torques for proving the mechanical tightness of screw connections/terminals

Thread diameter		Tightening torque (Nm)		
Metric standard values	Diameter range	I	II	III
1.6	1.6	0.05	0.1	0.1
2.0	1.6 to 2.0	0.1	0.2	0.2
2.5	2.0 to 2.8	0.2	0.4	0.4
3.0	2.8 to 3.0	0.25	0.5	0.5
-	3.0 to 3.2	0.3	0.6	0.6
3.5	3.2 to 3.6	0.4	0.8	0.8
4	3.6 to 4.1	0.7	1.2	1.2
4.5	4.1 to 4.7	0.8	1.8	1.8
5	4.7 to 5.3	0.8	2.0	2.0
6	5.3 to 6.0	1.2	2.5	3.0
8	6.0 to 8.0	2.5	3.5	6.0
10	8.0 to 10.0	-	4.0	10.0
12	10 to 12	-	-	14.0
14	12 to 15	-	-	19.0
16	15 to 20	-	-	25.0
20	20 to 24	-	-	36.0
24	24	-	-	50.0

**Column I:** Applies for screws without heads that do not protrude from the thread hole and for screws that can only be tightened with screwdrivers with an edge narrower than the screw's thread core diameter.

**Column II:** Applies for nuts and screws that are tightened with screwdrivers.

**Column III:** Applies for nuts and screws that can be tightened with tools other than screwdrivers.

# Definition of the IP degrees of protection

For applications in industrial environments, degrees of protections and standards were defined that specify the environmental impact regarding contact, protection against foreign bodies and humidity to which a system can be exposed without being damaged. The degrees of protection are defined in the IP standard of DIN EN 60 529: degrees of protection achieved through housings (IP code).

The IP code consists of a two-digit number that indicates the relevant protection degree. The first digit specifies the protection degree for the protection against contact and foreign bodies while the second digit specifies the protection against water and humidity.

## Practical notes:

For "normal" industrial systems where multipole connectors are used in closed factory halls, protection according to IP54 is normally offered = protected against dust + protected against splashing water. This protection is normally completely sufficient. For systems in outdoor applications (vehicles, snow guns, etc.) we recommend protection according to IP65 = dust-proof + protected against jets of water. A protection according to IP67 or IP68 is required for only a few outdoor applications unless a continuous immersion of the components cannot be avoided.

The following tables are to describe the protection degrees in detail:

**Table 1: Protection against contact and foreign bodies**

1st	Protection against accidental contact	Protection against foreign bodies
0	No protection	No protection
1	Protection against contact with large parts of the body, for example the back of the hand	Protection against foreign bodies with a diameter of 50 mm and larger.
2	Protection against contact with the finger of 12.5 mm and larger.	Protection against foreign bodies with a diameter of 12.5 mm and larger.
3	Protection against contact with tools and wires larger than 2.5 mm	Protection against foreign bodies with a diameter of 2.5 mm and larger.
4	Protection against contact with tools and wires larger than 1 mm	Protection against foreign bodies with a diameter of 1 mm and larger.
5	Complete protection against accidental contact	Protection against dust: Penetration of dust is not fully prevented, but dust must not penetrate to such an extent that the equipment's functionality or safety is restricted in any way
6	Complete protection against accidental contact	Dustproof: No penetration of dust possible with a negative pressure of 20 mbar.

## Definition of the IP degrees of protection

**Table 2: Water protection**

2nd	<b>Protection against ingress of water</b>
<b>0</b>	No protection
<b>1</b>	Protection against dripping water: Dripping water falling vertically must not have a damaging effect
<b>2</b>	Protection against dripping water up to a tilt of 15°: Dripping water falling vertically must not have a damaging effect, if the equipment is tilted by up to 15°.
<b>3</b>	Protection against spraying water: Water that is sprayed in an angle of up to 60° must not have any damaging effect
<b>4</b>	Protection against splashing water: Water spraying from all directions towards the equipment must not have any damaging effect
<b>5</b>	Protection from jets of water: Jets of water directed towards the equipment from all directions must not have any damaging effect
<b>6</b>	Protection from powerful jets of water: Powerful jets of water that are directed towards the housing from all directions must not have any damaging effect.
<b>7</b>	Protection from temporary immersion in water: Water must not ingress in a quantity that has a damaging effect, if the housing is temporarily immersed in water under standardized pressure and time conditions
<b>8</b>	Protection from continuous immersion in water: Water must not ingress in a quantity that has a damaging effect, if the housing is continuously immersed in water under conditions agreed upon between the manufacturer and the user. The conditions must however be more severe than for key figure 7.
<b>9</b>	Protected against ingress of water from all directions, even with highly increased pressure against the housing. (High-pressure/steam jet cleaner, 80–100 bar)

# Definition of the IP degrees of protection

## Degrees of protection against water, designated by the second index number

The second index number defines the level of protection provided by the housing against damaging influences on the equipment resulting from the intrusion of water.

Table 3 gives short descriptions and definitions for the degrees of protection defined by the second index number.

Degrees of protection listed in this table may only be determined using the second index number and not through reference to the brief description or definition.

Up to the second index number 6, the description means that the requirements for all lower index numbers are also fulfilled.

A housing designated with just the second index number 7 or 8 is considered unsuitable for exposure to jet-spray water (designated with the second index number 5 or 6) and does not need to meet the requirements of index numbers 5 or 6, unless equipped with a double designation according to the following table:

**Table 3: Degrees of protection**

The housing meets the test for			
jet-spray water, second index number	Temporary/permanent submersion second index number	Description and label	Area of application
5	7	IPX5 / IPX7	Multipurpose
6	7	IPX6 / IPX7	Multipurpose
5	8	IPX5 / IPX8	Multipurpose
6	8	IPX6 / IPX8	Multipurpose
	7	IPX7	Restricted
	8	IPX8	Restricted

Housings for "**multipurpose**" use, as specified in the last column, must meet the requirements, both when exposed to jet-spray water or when temporarily or permanently submerged.

Housings for "**restricted**" use, as specified in the last column, are considered suitable only for temporary or permanent submersion and unsuitable for exposure to jet-spray water.

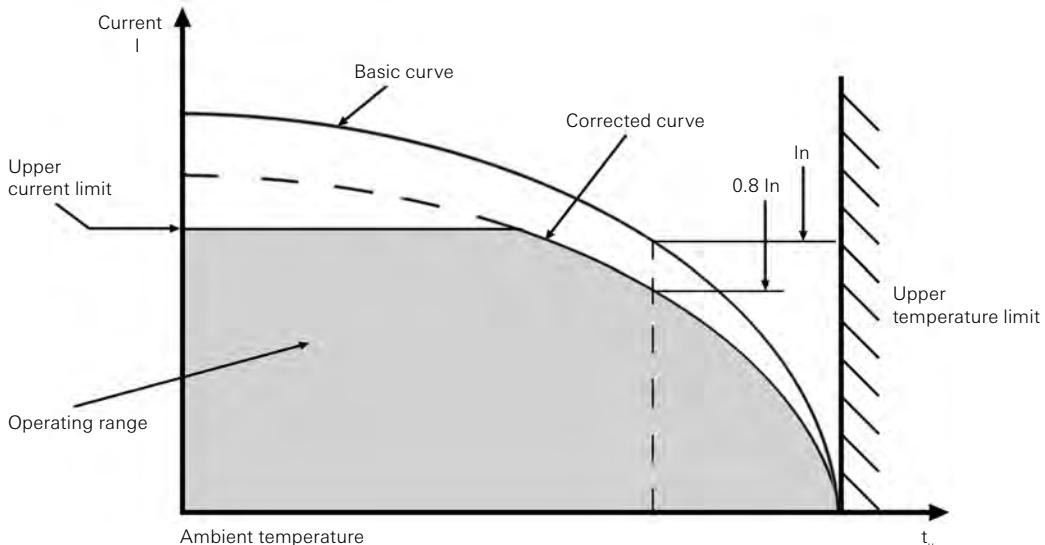

## Current carrying capacity - Derating behavior of **revos** industrial multipole connectors

Like any other connector, the **revos** industrial multipole connector also faces a reduction in the values for the current carrying capacity when the ambient temperature rises.

This behavior is called derating behavior. Basic information on the derating behavior of connectors is provided in standard DIN EN 60 512-5-2-2003.

Each contact insert is characterized by its rated current, among other things. The rated current is the current that a connector can carry in an ambient temperature of 40°C, simultaneously continued (not intermittent) over all contacts without exceeding the permissible upper temperature limit.

The derating curve shows the maximum current  $I$  at the given ambient temperature without the connector exceeding the upper temperature limit.

Curve of current carrying capacity derived from the basic curve  
Source DIN EN 60 512-5-2-2003

## Current carrying capacity

The current carrying capacity for plug connectors is determined and established based on DIN EN 61 984/VDE 0627: 2009 and DIN EN 175 301-801: 2007, if applicable.

During proper use, the contact inserts of the **revos** series must not be inserted or removed under load or when live.

The contact inserts of the **revos** series are type-tested according to UL 1977 and C22.2 NO 182.1 and must not be inserted or removed when under load.

The rated current is the maximum operating current. The temperature resistance of the used connection cable must be suitable for the intended purpose.  
(IEC 60 364-5-52 / DIN VDE 0298-4)

### Remark on double PE connection:

The PE connection always has to be designed equally on both sides to ensure the consistency of the PE connection. A certified electrician must ensure PE consistency, if connectors with two electrically insulated PE connections are used.

The protection function must be ensured by suitable measures if used in plastic housings or during maintenance work on the connectors outside the metal housing.

## Information on how to change over from PG to metric threads

### Basic legal conditions

The European standard EN 50 262 "Metric Cable Glands for Electrical Installation" was ratified on April 01, 1989 by CENELEC (European Committee for Electrotechnical Standardization) and put into force.

The big difference in the new EN standard is it has the character of a safety standard. As a building standard it only defines the metric thread and its lead.

PG threads  
are available on  
request!

## Selection criteria and characteristics of the different contact platings tin, silver and gold

### Contact platings

The core of an electric plug connection is the contact pair, consisting of the socket and plug contacts. Contacts are produced almost exclusively from copper alloys, and Wieland Electric GmbH uses contact platings made of tin, silver and gold, depending on the product specification:

Tin is corrosion-resistant; silver offers favorable conditions at high current and with cyclical switching processes; gold offers protection against aggressive environmental conditions.

- **revos** – 16 A plug connector in screw and crimp design are available in all three surface platings, tin, silver and gold.

- **revos** – 16 A plug connectors with spring clamp contacts are available with silver-plating

- **revos** – 16 A multipole adapters are normally available tin-plated.

- **revos** – hybrid plug connectors are normally supplied in a tin version for  $I \leq 16$  A and in a silver-plated version for  $I > 16$  A.

**Tin-plated**

**Silver-plated**

**Gold-plated**

AT.TS@wieland-electric.com

**Inserts with tin-plated contacts:**

Offers excellent resistance to the corrosive gases SO<sub>2</sub> and H<sub>2</sub>S. Tin-plated contacts are especially well suited for transmitting low voltages and current in the millivolt and μA range, but also for typical signal voltages, such

**Inserts connectors with silver-plated contacts:**

Silver-plated contacts extend the operating life of the plug connector when there is strong current, in particular with cyclical motor start-up current that is markedly above the nominal current of the plug connectors. For example, in use on plastic injection molding machines that switch current on and off within seconds. Silver-plated contacts have proven themselves when the maximum current load capacity limit of 16 A was almost surpassed. Here, too, longer life cycles can be achieved.

In the range of high contact temperatures (> 100 °C), silver-plated contacts are preferable to tin-plated contacts.

Aging of silver contacts due to the influence of industrial atmospheres.

During the lifetime of the silver contacts, a silver sulfide layer can form due to the increased affinity of silver for sulfur, which is present in industrial atmospheres in small amounts.

**Inserts connectors with gold-plated contacts:**

In areas where high signal precision is required and the signals are transmitted through extremely small current and low voltage, signal distortions can occur with silver contacts with a silver sulfide layer. To simplify, the following values can be used: For current < 5 mA and voltages up to 5 V, tin-plated or gold-plated contacts

**Conclusion:**

Fundamentally, tin-plated contacts are very good or better suited than silver-plated contacts for all types of signal current. For stronger current, when used with high ambient temperatures or a cyclical electric current, longer service lives can be expected with silver-plated contacts. Gold-plated contacts should be used in the range of very low voltage and current.

as 24 V and lower ampere, or network voltage and corresponding current.

Through the chemical reaction of the silver with the gaseous sulfur in the surrounding air, brown to black layers arise, which result in coloring of the surface.

The chemical reaction of the silver surfaces on the plug systems of Wieland Electric GmbH can be delayed by passivating the silver-plated surfaces at the factory with an additional layer. This passivation protects the silver temporarily from a reaction with the gaseous sulfur in the surrounding air. Every currently known passivation layer will protect the silver surface for a limited time only, and a silver sulfide layer, including a black-brown coloration, will form.

This soft layer is extremely thin and is broken through when the contacts are mated. As a result, low transmission resistance is assured, even for colored contacts. This has been proven in numerous examinations in our laboratory.

are recommended.

But for extreme applications, only gold-plated contacts should be used.

Wieland has decades of experience in the area of pluggable connection technology. We offer the best-possible contact with the optimal plating for every application.

# Explanations of applications in hazardous areas

**revos Ex**-multipole connectors are designed for special applications in hazardous areas. Their use in zone 0 for intrinsic circuits has been approved by the DEKRA EXAM test institute. The housings for the multipole connectors are manufactured from die cast zinc alloy.

## Operating instructions for the connector series „revos Ex...“

A pluggable connection consists of a hood, a base as well as a female and male insert.

Installation of a pluggable connection must be prepared as follows:

- Closed bottom housings must be fixed with screws to a flat surface using the available bore holes.
- Open-bottom housings must be fixed with screws to a flat surface using the available bore holes.  
Before fixing the housing to the surface, ensure that the seal fixed to the base at the time of delivery is mounted correctly.
- The female insert and male insert must be screwed into the hood (or alternatively screwed into the base) using the screws already attached to the frame of the male or female connector.
- The cables are connected to the male connectors and female connectors using the screw connection with a torque of 0.5 Nm.

The components are made ready for operation by plugging the hood and base together and latching them.

The relevant connectors must be mounted to device in a way that at least protection degree IP 54 according to EN 60529 is ensured.

The „revos Ex“ connectors are designed for use in an ambient temperature range at installation site of –20°C bis +60°C.

### **Usage note:**

The “revos Ex” plug connector series can be used with a rated voltage of 90 V and a permissible cable cross-section of 0.5 mm<sup>2</sup> to 2.5 mm<sup>2</sup> for the following application areas according to ATEX directive 94/9/EC and the EN 60079-0:2006, EN 60079-11:2007 and EN 50303:2000 standards:

Proof is provided by the marking of the Ex area on the individual components of the connector.

Permissible conductor cross section:	1.5 mm <sup>2</sup> to	2.5 mm <sup>2</sup>	to	16 A
		1.0 mm <sup>2</sup>	to	10 A
		0.75 mm <sup>2</sup>	to	6 A
		0.5 mm <sup>2</sup>	to	3 A

### 2nd Supplement

(Supplement in accordance with Directive 94/9/EC Annex III number 6)  
to the EC-Type Examination Certificate  
BVS 03 ATEX E 184 X

Equipment: Industrial multipole connectors revos type Ex\*\*  
Manufacturer: Wieland Electric GmbH  
Address: 96052 Bamberg, Germany

#### Description

The reason for the issuance of this supplement is to certify the conformity of this equipment with the standard level of EN 60079-0:2006, EN 60079-11:2007 and EN 50303:2000 as well as changing the apparatus category to M1.

The industrial multipole connectors revos type Ex\*\* are rectangular connectors available in a 6-, 10-, 16-, 24-, and 48-pole variants with a screw-type terminal and suitable for a wire range of 0.5 – 2.5mm² which allow to connect single-conductors or fine-wired conductors. The upper and lower section of the enclosures are available in an one hand or two hand interlocking variant and as needed for mounting to an equipment or as a free cable joint.

The connector contains only parts which do not affect the type of protection intrinsic safety. Due to the equipments type of construction the different intrinsically safe circuits are separated up to a sum of voltages (peak values) of 90 V.

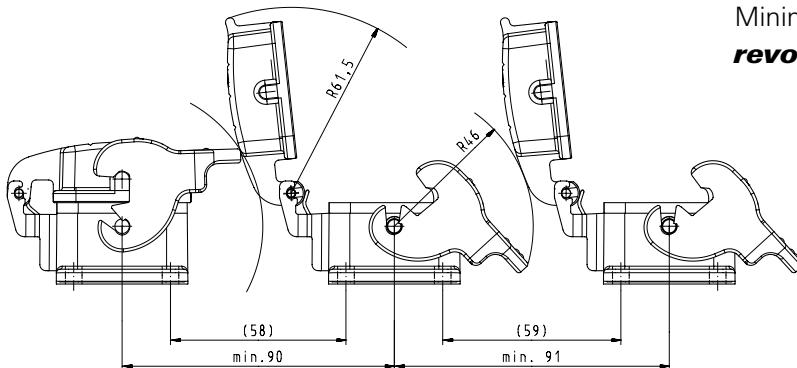

The Essential Health and Safety Requirements of the modified equipment are assured by compliance with:  
EN 60079-0:2006 General requirements  
EN 60079-11:2007 Intrinsic safety 'i'  
EN 50303:2000 MT Equipment

The marking of the equipment shall include the following:

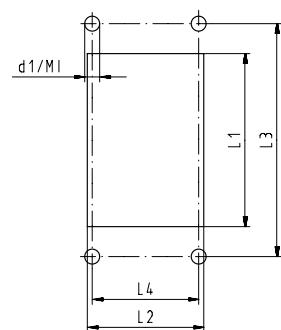

I M1 Ex ia I

## Detailed table of contents

				Page
Introduction				6–25
<b>revos</b>	<b>revos MINI</b>		3 to 12-pole, 50–400 V, 10 A	28–31
Contact inserts see from page 26	<b>revos BASIC</b>	500 V 16 A	6 to 48-pole, 500 V, 16 A, screw connection	32–33
			6 to 48-pole, 500 V, 16 A, spring clamp connection	34–35
			6 to 24-pole, 500 V, 16 A, double spring clamp connection	36–37
			6 to 24-pole, 500 V, 16 A, push-in connection	38–39
			6 to 48-pole, 500 V, 16 A, crimp connection	40–41
	<b>revos BASIC EE</b>		10 to 46-pole, 500 V, 16 A, crimp connection	42–43
Multipole adapters	<b>revos BASIC</b>		6 to 24-pole, 500 V, 16 A, multipole adapters, screw connection	44–45
			6 to 24-pole, 500 V, 16 A, set of 2 components, single locking lever	46–47
			10 to 24-pole, 500 V, 16 A, set of 2 components, double locking lever	48–49
			6 to 24-pole, 500 V, 16 A, multipole adapters, spring clamp connection	50–51
Contact inserts	<b>revos BASIC</b>	400/690 V 16 A	3 to 16-pole, 400/690 V, 16 A, screw connection	52–53
		690 V 16 A	6 to 48-pole, 690 V, 16 A, screw connection	54–55
			6 to 24-pole, 690 V, 16 A, crimp connection	56–57
		830 V 16 A	3 to 10-pole, 830 V, 16 A, spring clamp connection	58–59
	<b>revos DD</b>	250 V 10 A	24 to 108-pole, 250 V, 10 A, crimp connection	60–61
	<b>revos HD</b>	250 V 10 A	10 to 32-pole, 250 V, 10 A, screw connection	62–63
			15 to 64-pole, 250 V, 10 A, crimp connection	64–67
			40 and 64-pole, 250 V multipole adapters, screw connection	68–69
	<b>revos POWER</b>	400 V – 690 V 35 A	6-pole + ground, 400–690 V, 35 A, screw connection	70–71
		400/690 V 82 A	4-pole + ground, 400/690 V, 82 A, screw connection	72
		690 V 4x35 A, 6x16 A	4/6-pole + ground, 690 V, screw connection	73
		400/690 V 40 A + 230/400 V 16 A	6-/6-pole + ground, screw connection	74
		400/690 V 100 A + 400/690 V 40 A + 230/400 V 16 A	3-/3-/6-pole + ground, screw connection	75
		690 V 82 A + 400 V 16 A	4-/2-pole + ground, 690/400 V, screw connection	76
		400 V 80 A + 400 V 16 A	4-/8-pole + ground, screw connection	77
		690 V 40 A + 250 V 10 A	12-/2-pole + ground, crimp connection	78–79
		690 V 40 A + 160 V 10 A	6-/36-pole + ground, crimp connection	80–81
		230/400 V 16 A + 160 V 10 A	8-/24-pole + ground, crimp connection	82–83
Multipole adapters		400 V and 690 V 35A	6-pole + ground, 400 V/6-pole + ground, 690 V, screw connection	84
		500 V	4-/6-pole + ground, 500 V, screw connection	85
	<b>revos IT</b>		Data cable feed-through	86
Contact inserts	<b>revos ☺</b>	90 V 16 A	6 to 48-pole, 3–16 A, screw connection	88–89
Modular pluggable connector system	<b>revos FLEX</b>	100 V to 5,5 kV	3 to 20-polig modular inserts, 250V to 1000V, crimp connection/modular blind piece	90–95
			Pneumatic-, high-voltage-module	96–97
			High-current module	98–100
			Spring clamp-, USB-, Profibus-, RJ45 module, module frame, accessories	101–107
Connector	<b>revos FLEX COMPACT</b>	Size 1M	Module width 1, module carrier and upper shell, metall	108–109
Connector	<b>revos MOT</b>	690 V 16 A	10-pole, 690 V, 16 A plastic connector with contact inserts	110–111
<b>revos</b> housings see from page 112	<b>revos MINI</b>		Hoods and Bases, metal and plastic	114–117
	<b>revos BASIC</b>	Size 6/6H	Hoods, single locking lever, 6	118–119
			Hoods, single locking lever, 6H	120–121
			Bases, single locking lever, 6	122–123
			Bases, single locking lever, 6H	124–125
		Size 10/10H	Hoods, single locking lever 10, 10H	126–129
			Bases, single locking lever 10, 10H	130–133
			Hood, double locking lever 10, 10H	134–139
			Bases, double locking lever 10, 10H	140–143
		Size 16/16H	Hoods, single locking lever 16, 16 H	144–147
			Bases, single locking lever 16, 16 H	148–151
			Hoods, double locking lever 16, 16 H	152–158
			Hoods, double locking lever, 16XL	159
			Bases, double locking lever 16, 16 H	160–163

				Page	
<b>revos</b> BASIC	Size 24/24H	Hoods, single locking lever		164–167	
		Bases, single locking lever		168–171	
		Hoods, double locking lever		172–178	
		Hoods, double locking lever, 24XL		179	
		Bases, double locking lever		180–183	
	Size 32	Hoods/Bases, double locking lever		184–185	
	Size 48	Hoods/Bases, single locking lever		186–189	
	Size 6 to 24	EMC hoods/bases, double locking lever		190–191	
	Size 10	Motor connector housing, single locking lever		192

		Bases, single locking lever		242–243	
sets /4 components	<b>revos</b> BASIC	Size 6 to 24 / 500 V	Complete multipole connector sets (housing + contact inserts)	244–245	
<b>revos</b> Acessórios see from page 246	<b>revos</b>	mounting frame	Mounting frame size 6 to 24 for DIN rail mount	248–249	
	<b>revos</b>	cover and reducer plates	Cover and reducer plates for control cabinet installation	250–251	
	<b>revos</b>	coding accessories	Coding bolts, coding pins and female coding pieces	252–256	
	<b>revos</b>	Docking frame	Docking frame, size 6 to 24	257	
	<b>revos</b>	cable glands	Metal and plastic glands IP68	258	
			Metal glands IP54	259	
			Reduction pieces, expansion pieces and PG/metric adapter	260	
			Blind piece	261	
	<b>revos</b> BASIC		Size 6 to 32 Protective cover with or without locking levers, IP65	262–264	
			Size 6 to 24, protective cover, latching	265	
	<b>revos</b> MINI	protective cover	Protective cover with and without gasket, IP65	265	
	<b>revos</b>	tools	Crimping tool, insulation stripping tool, Screwdriver and Jumper bar	266	
	<b>revos</b>	marking accessories	Marking accessories and marking tag carriers	267–269	
<b>facts&amp;DATA</b> see from page 270		Conductor connections		272–273	
		Tightening torque		274	
		Definition of the IP degrees of protection		275–277	
		Current load capacity - Derating behavior		278–279	
		Information on how to change over from PG to metric threads		279	
		Selection criteria for the contact surfaces tin, silver and gold		280–281	
		Explanations of applications in hazardous areas		282–283	
		Installation spacing and mounting dimensions		284–286	
		<b>revos</b>  Installation example		287	
		Crimping tool, Assignment of contacts to appropriate crimping tool		288–289
