

## KNX switching actuator, 4-gang 16 A with manual actuation and current measurement for C-loads

Specification	Order No.	Packing unit	£/piece without VAT	PS	EAN
 DRA plus	1045 00	1	339.71	26	4010337042266

DRA switching actuators with integrated bus coupler. For switching independently controllable groups of loads. With manual switch for switching over the relay (On/Off) parallel or without KNX operation. Multi-phase connection. No additional power supply required.

### Features

- Manual actuation of the relay independent of the bus or switching position indication.
- NO contact or NC contact operation.
- Central switching function.
- Group feedback for reduction of bus load.
- Active or passive (object can be read out) cyclical feedback function.
- Feedback can be delayed until after the recovery of bus voltage.
- Logical linking function for each output.
- Block function can be parameterised for each channel. As an alternative, forced setting function for each output.
- Time functions (switch-on/off delay, staircase light function – also with advance warning function).
- Integration in light scenes is possible, eight internal scenes at the most can be parameterised per channel.
- Memory function for light scenes.
- Elapsed operating time meter as forward/backward counter with limit function (limit can be changed via bus) can be activated for each output.
- Input monitoring for cyclical updating with safety setting.
- Reactions in case of bus voltage failure and restoration can be set for each channel following an ETS programming process.
- The switching contacts of the switching actuator, 4-gang, C-load are especially designed for loads with a capacitive character, and therefore conditional, brief, high switch-on currents (see Technical Data).
- The switching actuator has an integrated current detection.
- A current measurement can be carried out for each channel.
- Independent switching of the four outputs.
- Current detection: Measurement of load current for each channel.
- Threshold values for load monitoring (e.g. signalling of load failure).

### Technical data

KNX medium: TP256

#### Connections

- KNX: Connection and junction terminal

- Load:	Screw terminals
Relay	
- Number:	4
- Contact:	1 x zero-voltage NO contact each, flip-flop
Switching capacity AC 230 V:	16 A / AC1 or 16 A / AC3
Switching capacity AC 400 V:	10 A / AC1 or 10 A / AC3
Switching capacity	
- DC:	16 A/24 V
Maximum switch-on current:	600 A, 150 µs, 300 A, 600 µs
Connected load	
- Ohmic load:	3680 W
- Capacitive load AC 230 V:	16 A, max. 200 µF
- Light bulbs:	3680 W
- HV halogen lamps:	3680 W
- Wound transformer:	2000 VA
- Tronic transformer:	2500 W
- Fluorescent lamps, uncompensated:	3680 VA
- Fluorescent lamps, duo-circuit:	3680 VA
- Fluorescent lamps, parallel-compensated:	2500 VA
- Mercury-vapour lamps, uncompensated:	3680 W
- Mercury-vapour lamps, parallel-compensated:	3680 W
Connections:	max. 4 mm <sup>2</sup>
Current detection:	0.25 to 16 A sine
Current detection:	50/60 Hz

---

## Notes

- Installation on DIN top-hat rail.
  - VDE approval in accordance with EN 60669-1, EN 60669-2-1.
- 

## Scope of supply

- KNX connection and junction terminal included in the scope of supply.
- 

## Dimensions

Modular widths (MW): 4
