Features

- The bus coupler 3 connects the KNX system to an application module for KNX.
- The combination of bus coupler 3 and application module represents a functional unit.
- In the ETS project, this unit is configured in the form of the application program of the application module.
- In addition, a remote temperature sensor can be connected to the bus coupler 3 with remote sensor. This enables a room temperature controller to record the temperature at an additional measuring point.
