When the job requires quick decisions in rough conditions – you need information at a glance. Even at a distance – or from an extreme angle. Until now, displays simply haven't been reliable enough to handle such tough requirements. That is – until Lumineq EL40S.

WHAT MAKES LUMINEQ EL40S SO SPECIAL?

- Unmatched readability – We're out to make a difference. Lumineq EL40S can be easily read in all types of tough working environments. We're introducing a new level of readability that has never been possible before.
- Unmatched clarity, brightness, contrast – No drawbacks of conventional display technologies, where day and nighttime lighting affects the clarity of content. The EL40S stays bright and clear – at temperatures from -60 °C up to +85 °C.
- Easy viewing from a distance – From 20 meters and beyond, this display is easy to read. Even off-angle and off-axis. Only a quick glance is needed to grasp vital information.
- Long lifetime – Durability is simply outstanding. No need to send service technicians to remote places to repair. These displays are built to last in humid and oscillating conditions, year after year.
- No hassle in the field – With its unrivaled readability, EL40S adds to your safety, efficiency and ergonomics in extreme conditions. As a start, it's easy to replace any of your current display solutions with the brilliance of the Lumineq EL40S.

Contact us to join the revolution for the best-ever display readability. We'll tell you more.
