Clustering	Not supported
Energy meter	Class 2 energy meter, MID optional
Smart building integration	Not supported
User interface	LED status lights
Material	Aluminium housing, Polycarbonate Lexan cover plate
Colour options	Graphite Grey

Safe and simple

INCH Lite is a fuss-free EV charger that conveys the same design qualities as the INCH wall box family. It is good-looking, sturdy, and made from sustainable materials.

INCH Lite allows safe charging at home with built-in electrical protection and simple plug & play mode. At the same time, built-in cable holder keeps charging cable away, when not in use.

Thanks to its minimalistic approach and optional interactive upgrade, INCH Lite is built to outlast your EV – without the hefty price tag.

- A simplified user interface with LED status indicator offers just enough information for uninterrupted daily use.
- The larger size provides ample space for the built-in electrical protection.
- Simple plug & play mode with pre-set configuration allows fast installation.
- Sturdy aluminium housing keeps components safe and secure, thus increasing the charger life. Durability reflects in an extended product warranty.

INCH LITE

ETREL provides building blocks for a diverse range of e-mobility ecosystems. INCH interactive charging stations combined with OCEAN charging management software, can serve as a backbone of any e-mobility business.

40+

Countries
