

AIRAM RGB CCT DIM 3 in 1 Zigbee Remote

4016038 A0LTAB

Important: Read All Instructions Prior to Installation

Function introduction

Bottom side

Product Data

Protocol	ZigBee 3.0
Operation Voltage	3V(2*AAA battery)
Transmission Frequency	2.4GHz
Transmission Range (free field)	30m
Dimming Range	0.1%-100%
Dimension	140x44x17mm
Protection Grade	IP20

- ZigBee RGB+CCT+DIM remote based on ZigBee 3.0
- High sensitive & high stable touch color wheel, fast & precise color control
- Battery powered remote with low power consumption
- Enables to pair ZigBee lighting devices through touchlink commissioning
- Supports find and bind mode to pair with ZigBee lighting devices
- Supports 3 groups for binding max. 30 lighting devices
- With 6 preset scenes, enables to save and recall 5 scenes
- 2.4 GHz global operation
- Transmission range up to 30m
- Compatible with universal ZigBee Gateway products
- Enables to bind and control universal DIM, CCT, RGB, RGBW and RGB+CCT zigbee lighting devices

ZigBee Clusters Supported by This Remote Are As Follows:

Input clusters:

- Basic
- Power Configuration
- Identify
- Diagnostics

Output clusters:

- Identify
- Group
- Scene
- On/off
- Level control
- Ota
- Color control

Safety & Warnings

- This device contains AAA batteries that shall be stored and disposed properly.
- DO NOT expose the device to moisture.

Operation

1.This ZigBee remote is a wireless transmitter that communicates with a variety of ZigBee compatible systems. This transmitter sends wireless radio signals that are used to remotely control a compatible system.

2.This ZigBee remote supports 3 groups for binding max. 30 lighting devices and enables to control DIM, CCT, RGB, RGBW and RGB+CCT zigbee lighting devices.

3. Zigbee Network Pairing through Coordinator or Hub (Added to a Zigbee Network)

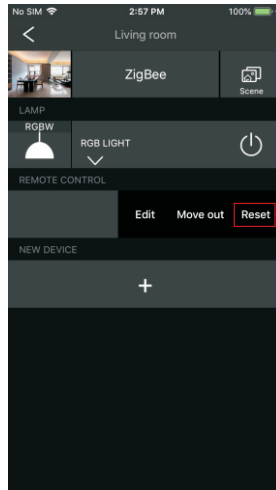

Step 1: Remove the remote from previous zigbee network if it has already been added to it, otherwise pairing will fail. Please refer to the part "Factory Reset Manually".

Step 4: Immediately short press to search nearby network, indicator flashes every 1 second, 20 seconds timeout if there is no network. Indicator will then blink 5 times quickly for successful pairing.

Note: 1) After pairing successfully, the remote information will appear on the controller or hub interface.
2) No remote information will appear on the hub interface if pairing to Philips Hue Bridge.

5. Removed from a Zigbee Network through Coordinator or Hub Interface

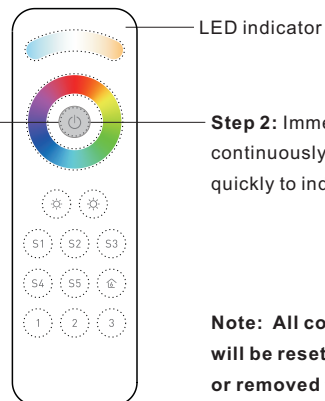

From your ZigBee controller or hub interface, choose to delete or reset the remote as instructed, indicator flashes 3 times quickly to indicate successful removing.

6. Factory Reset Manually

Step 1: Press and hold down until LED indicator turns on.

Step 2: Immediately short press 5 times continuously, indicator flashes 3 times quickly to indicate successful reset.

Note: All configuration parameters will be reset after the remote is reset or removed from the network.

4. TouchLink to a Zigbee Lighting Device

Step 1: Set the zigbee lighting device to start TouchLink commissioning, please refer to its manual to learn how.

Step 3: Press and hold down any group button to start TouchLink commissioning of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful pairing to the device and the light connected to the device will blink twice.

Step 2: Bring the remote within 10cm of the lighting device.

Note: 1) Directly TouchLink (both not added to a ZigBee network), each remote can link with 30 devices.
2) TouchLink after both added to a ZigBee network, each remote can link with max. 30 devices.
3) For Hue Bridge & Amazon Echo Plus, add remote and device to network first then TouchLink.
4) After TouchLink, the remote can control the linked lighting devices.

7. Remove a Touchlink Paired ZigBee Lighting Device

Step 1: Set the Touchlink paired zigbee device to start TouchLink commissioning, please refer to its manual to learn how.

Step 3: Short press the group button that the device was linked to.

Step 2: Bring the remote within 10cm of the lighting device.

Step 4: Press and hold down until LED indicator turns on.

Step 5: Immediately short press twice to start TouchLink removing of the remote. LED indicator flashes fast for 3S, then flash 6 times slowly to indicate successful removing.

8. Factory Reset a Lighting Device (Touch Reset)

Note: the device shall be added to a network, the remote added to the same one or not added to any network.

Step 1: Set the zigbee device to start TouchLink commissioning, refer to its manual.

Step 3: Press and hold down until LED indicator turns on.

Step 2: Bring the remote within 10cm of the lighting device.

Step 4: Immediately short press 5 times to start Touch Reset of the remote. LED indicator flashes fast for 3S, then flash 3 times slowly to indicate successful reset.

9. Find and Bind a Zigbee Lighting Device

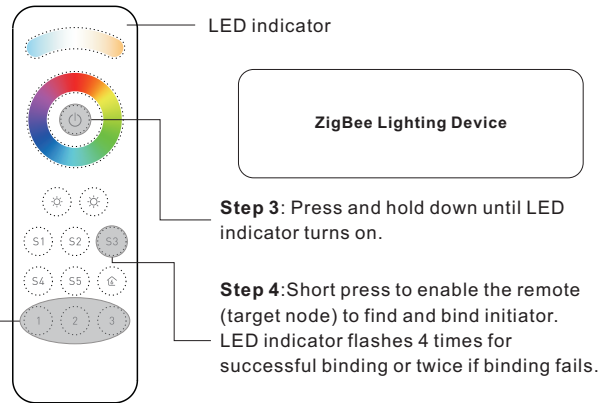

Note: Make sure the device and remote already added to the same zigbee network.

Step 1: Start find and bind mode on the ZigBee lighting device (initiator node) and enable it to find and bind target, refer to its manual.

Step 2: Short press a group button that you would like to bind the device to.

Step 3: Press and hold down until LED indicator turns on.

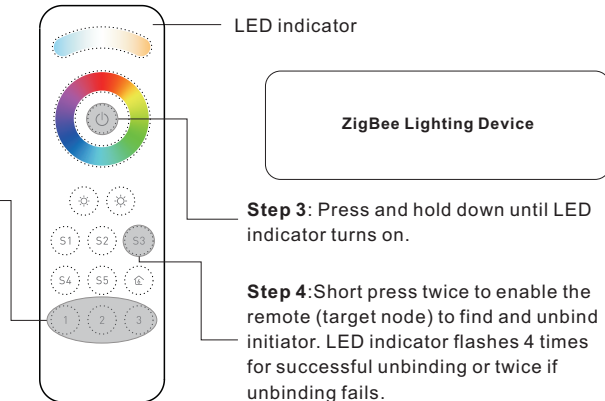

Note: Each remote can bind max. 30 lighting devices.

10. Find and Unbind a Zigbee Lighting Device

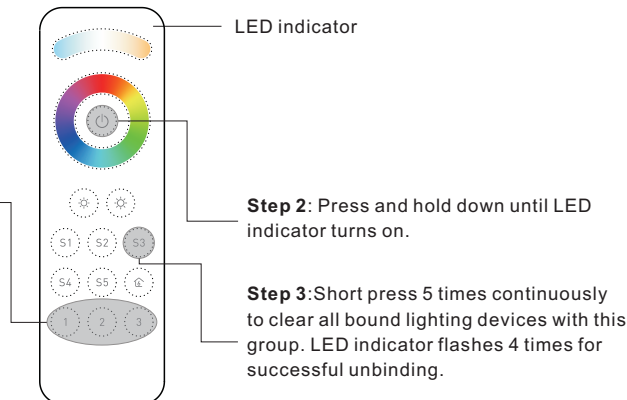

Step 1: Start find and bind mode on the ZigBee lighting device (initiator node) and enable it to find and unbind target, refer to its manual.

Step 2: Short press the group button that the device already bound to.

11. Clear All Find and Bind Mode Paired Lighting Devices of a Group

Step 1: Short press to choose the group that you would like to unbind all devices.

12. Setup a Network & Add Devices to the Network (No Coordinator or Hub Required)

Step 1: Factory reset the remote and the lighting device, refer to their manuals.

Step 2: TouchLink the remote and device to setup a network, refer to their manuals.

Step 3: Short press button S1 to enable the network to discover and add devices, LED indicator will flash twice. 180 seconds timeout, repeat the operation.

LED indicator

< 10cm

ZigBee Lighting Device

Step 4: Set another remote into network pairing mode and pair it to the network, refer to its manual.

Step 5: Add more remotes to the network as you would like.

Step 6: Factory reset the lighting devices that you would like to add to the network, refer to their manuals.

Step 7: Touchlink to pair the added remotes and lighting devices you would like to add, the devices will be added to the network through Touchlink, refer to their manuals.

13. OTA

Short press any button, indicator blinking means the remote has already been added to a network. No blinking of indicator means the remote does not belong to any network.

14. How to Check Whether the Remote Belongs to a Network or not

Short press any other buttons except group buttons, indicator blinking means the remote has already been added to a network, no blinking of indicator means the remote does not belong to any network.

15. Battery Power Monitor Function

The remote will report battery power value to the coordinator under following situations:

- When powered on.
- When operating the switch to send data packets (over 4 hours since last operation).
- When added to the network by a coordinator.
