

Jaz

Installation manual – D87 & D113 – adjustable versions

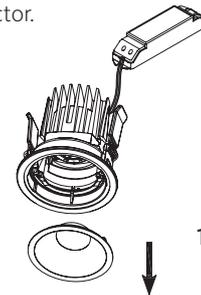

1: Make sure to turn off the main power.

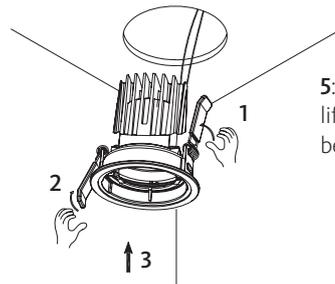

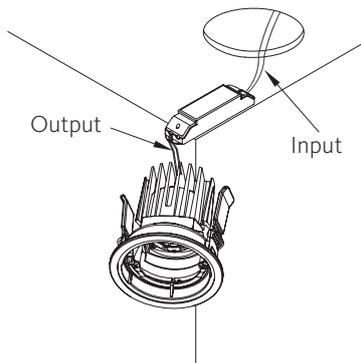

2: Cut-Out: Ø75/100 mm.

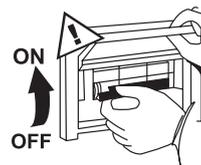

3: Take out the reflector.

4: Connect luminaire to main.

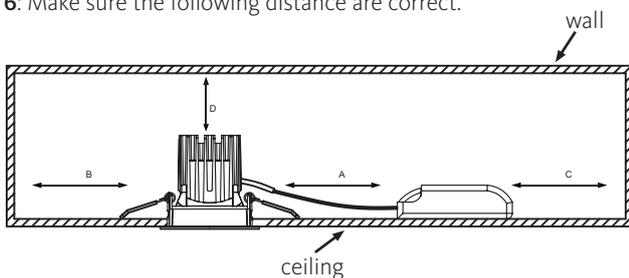

5: Push the spring upward, sufficiently lift the product so that the spring can be inserted into the ceiling.

7: Turn the power switch back on to verify that the product is working properly.

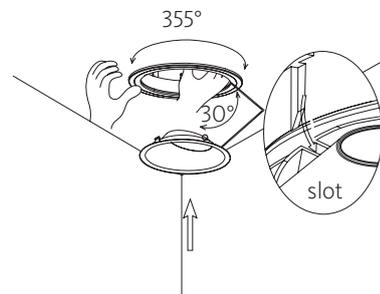

6: Make sure the following distance are correct.

A: min 0 mm.

B & C: min 100 mm.

D: min 40 mm.

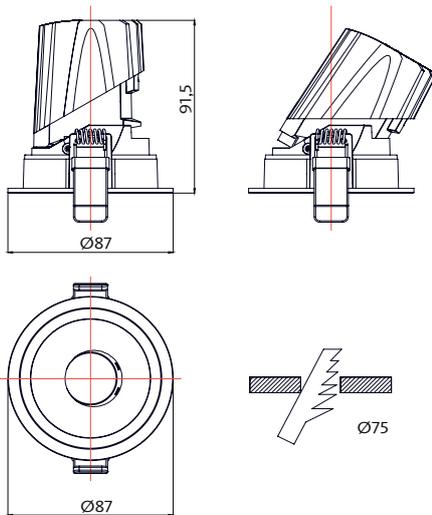

8: Adjust the luminaire to a right angle, then click the reflector inside the luminaire. Please keep the reflector in alignment with the slot when assembling, as showing in slot.
