

## Nestor Optimus Blowing Bead

### Features

- Brass end caps for air blown fiber such as NBFU (Nestor Blown Fibre Unit).
- Slim design improves blowing performance and reduces risk of stops during blowing.
- Easy to install with pliers.
- Two different sizes.

### Application

- Nestor Optimus Blowing Beads can be installed on the tip of the air blown fiber unit to ensure better blowing performance and longer installation distances.
- The product is recommended for long microduct routes with many connectors or bends.

### Installation

- Insert Nestor Optimus Blowing Bead onto the air blown fiber unit and attach it onto it's place by pressing it gently with pliers. Do not use too much force and make sure that the blowing bead does not flatten too much.
- Always check that the blowing bead size is in accordance with the cable outer diameter. The bead should fit to fiber unit firmly.
