NEW

ALMOST.

MP One[®] is here, the one and only two-component silicone gel in one single bottle.

MIXAPPEAL

Thanks to the **TWIST&GO Technology**, designed and patented by Etelec, which **enables you to mix the gel directly in the bottle** without using any other containers, **MP One®** guarantees the performance that has made Etelec gel products a great success, also offering **maximum practicality** and **rapidity of use**, even in difficult working conditions.

Etelec and MP One®, a **combination** of **quality, research** and **innovation** that will now **change your world** and your way.

Of working.

Extremely fast reticulation, extremely reduced installation times.

5 STEPS

Five simple steps for an innovative mixing system.

The **pre-set amount of components**, make use of **MP One® precise** and **error-free** with no waste for maximum use of the supplied amount.

1

Remove the white tear-off safety ring that prevents accidental opening of the capsule containing the second component, which also guarantees product integrity

2

Screw the top yellow cap all the way on. Check that the blue component is released into the bottle

3

Shake the bottle for 15 seconds to obtain an even blue mixture that can be checked through the MIXING COLOR CHECK window

4

Unscrew the cap completely to open the bottle

5

Pour the liquid into the enclosure being insulated

Something less, but so much more.

BI○

Etelec always chooses **nature** and today, with **MP One®**, even more forcefully by **eliminating** production of additional **containers to be disposed of**, such as bottles, jugs and palettes for mixing and opting for **cardboard packaging** made from **100% recycled materials** and **100% recyclable**, which becomes the real protagonist together with the content.

With **MP One®**, removing means adding more.

Adding awareness of a responsible and conscious choice, placing **nature in the foreground**, in everything and for everyone.

FEATURES

- › HIGH ELECTRICAL INSULATION
- › HIGH MOISTURE PROTECTION
- › RE-ENTERABLE
- › EXTRA FAST RETICULATION: 8 MINUTES AT 23°C
the extremely rapid cross-linking enables reduced installation times.
- › LOW VISCOSITY
enables effective filling of the gaps and empty spaces inside the box
- › NO EXPIRY DATE
- › COMPLIANT WITH EU DIRECTIVE 2015/863 (ROHS 3)
- › HALOGEN FREE
- › CLASSIFIED AS NON-HAZARDOUS
pursuant to European regulation no. 1272/2008 (clp)
- › ECO-FRIENDLY
- › NON-TOXIC
- › SOLVENT-FREE
- › ODOURLESS | NON-IRRITATING

FORMATS

All-in-one bottle

COD.	ARTICLE	VOLUME
MP103	MP One 300	300 ml
MP106	MP One 600	600 ml
MP109	MP One 900	900 ml

Reticulation time at 23°C	8 min
Operating temperature	from -60°C to +200°C
Dielectric strength	25,5 kV/mm

Printed on Recyral Polyedra paper | 100% recycled | certified FSC Recycled
