

■ Insulating LATEX gloves

➔ Insulating LATEX gloves

▶ STANDARD

EN 60 903:2003 et CEI 60 903: 2002
PPE Category III = Irreversible risks

▶ USE

Insulation of hands by class and according to the nominal supply voltage.
Must be used with a leather overglove for a mechanical protection.

▶ ADVANTAGES

Its ergonomic shape and lightly powdered interior make the glove easy to slip on and off.
Its natural latex base offers high dielectric characteristics.

▶ TECHNICAL SPECIFICATIONS

Beige natural latex insulating gloves for electricians, cut edges.

Class	Thickness (mm)	Operating voltage	Ref	Length	Size	Category
00	0,5	500	GLB00-36-*	36	7 to 12	AZC
0	1	1000	GLB0-36-*	36	7 to 12	AZC
