

# ACM cable marking

- Quick and easy marker production
- Print on standard laser printers
- Up to 60 labels in 15 seconds

It is the quickest, most cost-effective and easiest way to make cable markers.

Incredibly strong, non-tear, Polyester material. Accurate, laser-cut, perforations make it easy to remove printed labels. The marker is easily and quickly mounted, with cable ties, to any size of cable

Partex Creator software makes designing the markers incredibly straightforward.

## Technical information

- Material: Polyester
- Thickness: 250 micron
- Temperature: -40°C in +85°C  
Storage: +10°C to +25°C. RH 30% to 65%.  
Shelf life: 3 years
- Standard colors: yellow and white.  
Red, blue, green and orange on request.
- Software: Promark Creator
