QUICK TOOL F SOLUTION

1005W2-F

Termination

- 1.Strip off at least 1.2 inches of the jacket from the cable.
- 2.Press the wires through the projecting portion of terminals until they are fixed.
- 3.Put the F jack into the F tool, following the guide.
- 4.The tool adapts for both right-and -left-handed users.

- 5.Make sure the F jack is fixed onto the F tool.
- 6.Squeeze the handles of the F tool to terminate the F jack and cut extra wires.
- 7.Place the cap on the F jack and press to make sure it is fully seated.
- 8.Termination completed.
