

1 mW Visual Fault Locator (VFL) **GGM VFL1MW**

With its 1 mW output power, the VFL1MW allows testing signal continuity and detecting possible breaks on a fibre optic link up to 5 km.
The VFL also enables checking fibre polarity.

- Wavelength: 650 nm \pm 10 nm
- Emitter type: Class 2 laser diode (LED)
- Output power: 1 mW
- Max. signal transmission: 5 km
- Modulation: 2 Hz or CW select
- Universal 2.5 mm connectors (ST & SC)
- Power supply: 2 AAA alkaline batteries (included)
- Included accessories: protective soft case & replacement ceramic sleeve
