

## SFP Module 1000Mbps-SX LC connector, multimode, 550 m GGM MSFPSX

The GIGAMEDIA small form-factor pluggable (SFP) or Mini-GBIC is a hot-pluggable transceiver, compact used for data communications applications, supporting full duplex for Fast or Gigabit Ethernet speeds on multimode fiber or singlemode fiber for long distances. These modules are in "LC" connector, they interfaces a network device mother board (into a switch, media converter etc) to a fiber optic networking cable. This format is supported by many network component vendors.

### Specifications

- SFP-SX-1250 Mbps, Multimode, 850 nm, 550 m = 8.5 dB, 3.3 / 5 V, LC
- 1000Base-SX
- Duplex LC connector
- Full duplex operation
- 802.3x flow control support
- Power support: 3.3 V
- RoHS Compliant
- Hot pluggable
- Metal enclosure for lower EM

NB : For information, that will be always the switch which will determine what kind of module (speeds) you have to use "100 Mbps or 1000 Mbps".
