1. Introduction

1.1 Introduction to EXT-HDBT70M

The KanexPro EXT-HDBT70M is a compact sized extender set consisting of a transmitter and receiver. It uses HDBaseT™ technology to transmit uncompressed, high-resolution 1080p/ 4K signals from transmitter to the receiver via a CAT5e/CAT6a cable at a distance of up to 70/40m. Moreover, EXT-HDBT70M supports CEC, bi-directional RS232 & IR control, and bi-directional PoH (power over HDBaseT) function.

1.2 Features

- Support Full HD: Delivers high resolution image (1080p@60Hz@48 b/pixels/3D/4Kx2K).
- Maximum transmission distance is 70m for 1080p and 40m for 4Kx2K over single CAT5e/CAT6a cable
- High Bandwidth: 10.2Gps.
- HDTV Compatible, use HDMI 1.4 and HDCP2.2 compliant.
- Support CEC/IR/RS232 pass-through.
- Supports Bi-directional PoH function.
- Bi-directional RS232/IR control.
- UseS HDBaseT technology to transmit & extend over CATx
- LED indicators show work status.

3. System Connection

3.1 Usage Precautions

- System should be installed in a clean environment and has a prop temperature and humidity.
- All of the power switches, plugs, sockets and power cords should be insulated and safety.
- All devices should be connected before power on.
- Use shielded straight-thru CAT5e/CAT6a cable with TIA/EIA T568B terminations for good transmission effect.

3.2 System Diagram

3.3 Connection Procedure

- Step1.** Connect HDMI source (such as Laptop) to HDMI IN port of transmitter with HDMI cable.
- Step2.** Connect HDBT OUT port of transmitter and HDBT IN port of receiver, with single CAT5e/CAT6a cable.
- Step3.** Connect HDMI displayer (such as HDTV) to HDMI OUT port of receiver with HDMI cable.

Step4. Both transmitter and receiver have IR IN and OUT. When one end is used as an IR receiver, the signal sent from the end can only be transmitted via the other end.

For example: When “IR IN” of transmitter connects with an IR receiver, the IR emitter must connect to IR OUT of Receiver.

Step5. Connect the RS232 port of the devices to be controlled and the receiver or the transmitter.

Step6. Connect with DC24V power adaptor(s) One is enough if Transmitter or Receiver is connected with adapter as its PoH function).

3.4 Applications

Ideal for use in digital signage applications, healthcare AV, control rooms, educational facilities, airports, commanding centers and residential - home theater.

3.5 Twisted Pair Cable Connection

The twisted pair used in this extender MUST be a straight-through cable.

6. Troubleshooting & Maintenance

- **No image on display:**

- Ensure that the display device has been set to the correct input.
- Ensure that the HDMI cables used for both the source/transmitter and the receiver/display are properly connected and are working. Test the HDMI cables directly from a source to display and ensure their operation.
- Ensure that the CAT5e/CAT6a cable has not been damaged and that it has been terminated correctly with T568B on both ends. A temporary length of CAT5e/Cat6 can be used for testing to ensure that the devices are all compatible and working properly.
- Ensure proper grounding of the power supply.
- Known issues with HDMI 1.2 source devices:
- Older compatibility (HDMI 1.2) may result in HDBaseT transmission issues. Please contact Technical Support of your director for a solution to these issues.

- **Color lose or poor picture quality:**

- Ensure that the HDMI cables used for both the source and transmitter and the receiver and display are properly connected and are of good quality. Test the HDMI cables directly from a source to display and ensure their picture quality.
- Ensure proper grounding of the power supply.
- If the static becomes stronger or picture quality becomes worse when connecting the video connectors, this may be due to improper grounding.
- Check the grounding and make sure all the components are properly grounded to a common ground. Improper grounding may cause damage to the receiver.

If your problem persists after following the above troubleshooting steps, seek further help from authorized dealer or our technical assistance at support@kanexpro.com

7. After-sales Service

If there appear some problems when running the device, please check and deal with the problems reference to this user manual. Any transport costs are borne by the users during the warranty.
