

HDMI® 150m Extender over HDBaseT™ w/ loop out

Extend high res. 1080p/60 w/ bi-directional IR & RS-232

MPN: EXT-HDBT150M

The **KanexPro EXT-HDBT150M** is a transmitter - receiver set which enables you to extend 1080p/60 HD signals up to 492 feet (150 meters) over single CAT6 cable using HDBaseT Technology. It supports HDCP 1.4 with EDID pass-through. The extender supports PoE (power over Ethernet) requiring you to power from either the sender or receiver side. Locking power supplies gives you the utmost flexibility and secures HDMI cables in place to eliminate intermittent signal loss or disconnected HDMI cables. For control, the extender offers IR support and RS-232C for bi-directional control of devices to and from the extender.

Applications:

As mentioned above, this extender can be used in any environment where there is a need to extend high-resolution HDMI signals up to 492 ft. (150m) from an HDMI device like a computer to a remote display located far away.

FEATURES

- Compact 150m HDMI extender over CAT6
- Extends up to 492ft. (150m) with full HD 1080p/60
